

Píšťalky rozhodčího mohou být příčinou náhlého nárůstu srdečních problémů: Odborníci

 zerohedge.com/news/2022-02-24/insurers-vs-pharma

"Fašismus by se měl správněji nazývat korporativismus, protože je to spojení státní a korporativní moci." – Benito Mussolini

Pojďme přes pojišťovny. To je důležité, protože nám to poskytuje určitý způsob, jak porozumět potenciální cestovní mapě toho, jak pravděpodobně uvidíme, jak se to všechno bude během desetiletí odehrávat. Bude to znít nehorázně a možná se najdou někteří z vás, kteří mě označují za konspiračního teoretika, odpůrce toho, tamtoho nebo toho druhého, ale pokud mě už znáte, také byste věděli, že je mi to jedno. . Šokující, já vím.

Referee whistles may be cause to sudden increase in heart problems among sports players experts say

The recent discovery has come to light after a number of sports players have had incidents on the pitch and required medical assistance, referee whistle may also be causing incident's in sports fans attending games. All incidents are non vaccine related the public has been urged to ignore misinformation recently circulating on social media platforms

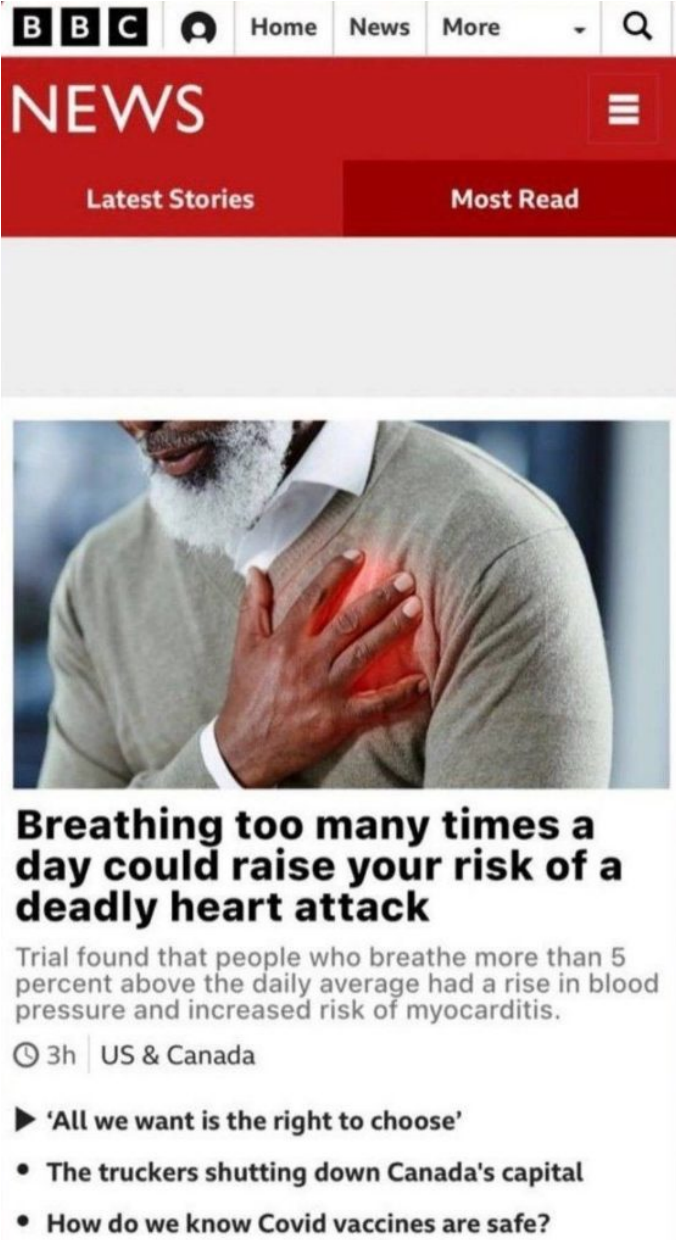

To lze snadno vyřešit. Zákaz píšťalek. Až na to, že to nebude fungovat, protože i ti nejhoupější z nás si budou myslet dvě věci. Za prvé, kde jsou všichni ti mrtví fotbalisté ze všech těch udavačství, které jsme měli... no, navždy? Nedej bože, aby si položili samozřejmou otázku. co se změnilo?

Zadruhé, když si přečtou „všechny incidenty nesouvisí s vakcínou“, mohou si položit otázku: „Není normální vyžadovat provedení pitvy, aby se zjistilo, jaká přesně mohla být příčina nebo příčiny? Je zvláštní, že novinář může určit takové věci.“ Ale tady s naprostou jistotou víme, že to nesouvisí s vakcínou. Žádná zmínka o ničem jiném než o vakcíně. Problém s tím byl zdůrazněn již v roce 2003 s tou strašlivou zpěvačkou Barbrou Streisand, nyní známou jako Streisandův efekt.

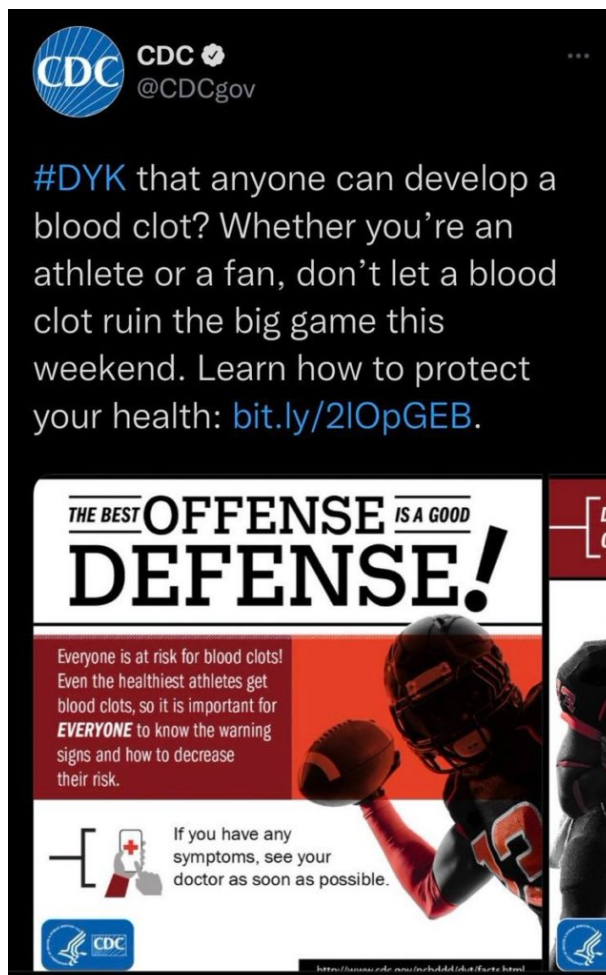

Streisandův efekt je jev, ke kterému dochází, když pokus skrýt, odstranit nebo cenzurovat informace má nezamýšlený důsledek zvýšení povědomí o těchto informacích, často prostřednictvím internetu. Je pojmenována po americké zpěvačce Barbře Streisand, jejíž pokus potlačit v roce 2003 bezděčně větší pozornost na fotografii projektu California Coastal Records z její rezidence v Malibu v Kalifornii, pořízenou za účelem zdokumentování eroze pobřeží Kalifornie.

Zmínka o tom, že to NENÍ s vakcínou, je trochu jako starý vtip. Zavři oči a cokoli budeš dělat, nemysli na růžového slona.

The image is a screenshot of a BBC News article. At the top, there is a navigation bar with the BBC logo, a home icon, and links for 'Home', 'News', and 'More'. Below this is a red header with the word 'NEWS' in white, a search icon, and a menu icon. Underneath the header are two tabs: 'Latest Stories' and 'Most Read'. The main content area features a photograph of a man with a white beard, wearing a light-colored sweater over a white shirt, holding his hand to his chest where a red glow indicates pain. Below the photo is the article title: 'Breathing too many times a day could raise your risk of a deadly heart attack'. The text below the title states: 'Trial found that people who breathe more than 5 percent above the daily average had a rise in blood pressure and increased risk of myocarditis.' Below this is a timestamp '3h' and the location 'US & Canada'. At the bottom, there is a section titled 'All we want is the right to choose' with two bullet points: 'The truckers shutting down Canada's capital' and 'How do we know Covid vaccines are safe?'.

Všichni víme o záplavě zejména profesionálních fotbalistů, kteří trpí bolestmi na hrudi. Nyní nás připravují na další:

Připravte se na rakovinu ... a HIV

Tak abych to uvedl na pravou míru. Když lidé dostávali testy PCR na Covid a zjistili jsme, že většina z nich byla falešně pozitivní, bylo to zcela ignorováno. Dokonce i poté, co faktické důkazy donutily portugalský nejvyšší soud rozhodnout, že nebudou použity.

Ale nyní, když se lidé nechávají „očkovat“ nebo bych měl říct injekčně experimentální drogou, lidé vracejí směšně vysoké pozitivní testy na HIV. To teď nemůžeme, že?

Pro ty z nás, kteří tomuto ďábelskému plánu věnovali pozornost, vzpomínáme na právě zesnulého Luca Montagniera, který nás – po prostudování obsahu vakcíny Pfizer – varoval, že obsahuje sekvence viru HIV.

A teď překvapení, překvapení.

Vysoce virulentní varianta HIV nalezená v oběhu v Evropě

Takže teď můžeme začít připravovat ovce na jejich vakcínu proti HIV. Věděl jsi to. Samozřejmě, že ano.

Prince Harry

Prince Harry: get tested for HIV to protect others in same way as for Covid

Moderna mRNA HIV vaccine: First patients vaccinated in clinical trial – CNN

The first participants have been vaccinated in a Phase 1 clinical trial of an experimental HIV vaccine that utilizes Moderna's mRNA technology, the company announced last week.

The trial, titled IAVI G002, is being conducted in partnership with IAVI, a nonprofit scientific research organization.

The new trial, funded in part by the Bill & Melinda Gates Foundation...

More on who funds them

New Plan To Speed AIDS Vaccine Development Released – Bill & Melinda Gates Foundation

The International AIDS Vaccine Initiative (IAVI) unveiled a new global scientific strategy to accelerate AIDS vaccine development, and said it will begin work on the plan with existing resources and newly announced grants from the William H. Gates Foundation, the World Bank and the Government of the United Kingdom.

It's becoming very clear that they are preparing a cover story for vaccine induced AIDS.

These headlines tell the story:

[Australia ends COVID-19 vaccine trials due to HIV antibody positives](#)
[| TheHealthSite.com](#)

[Moderna launches clinical trial for HIV mRNA vaccine like in Covid shot – Strange Sounds](#)

[Fast-spreading HIV variant doubles rate of immune system decline](#)
[| UN News](#)

[Highly virulent HIV variant found circulating in Europe](#)

[“TAKE THE TEST Brits urged to get HIV tests as heterosexual diagnoses higher for first time in a decade”](#)

When looking up HIV, we find this:

HIV (human immunodeficiency virus) is a virus that attacks cells that help the body fight infection, making a person more vulnerable to other infections and diseases. It is spread by contact with certain bodily fluids of a person with HIV, most commonly during unprotected sex (sex without a condom or HIV medicine to prevent or treat HIV), or through sharing injection drug equipment.

If left untreated, HIV can lead to the disease AIDS (acquired immunodeficiency syndrome). The human body can't get rid of HIV and no effective HIV cure exists. So, once you have HIV, you have it for life.

Thank goodness we have Big Pharma who can provide us with drugs for life that'll keep us alive.

I don't know what the coming “HIV outbreak” will be blamed on. Breathing too heavily, eating meat, Joe Rogan, or Russian hackers? In a throw-shit-at-the-wall and see what sticks strategy, possibly all

of the above. At this point really they're likely to make up anything.

What implications?

If you are planning on getting life insurance, it may be best to get it now if you can lock in pricing for as long a period as possible. These wily buggers often have clauses, though which allow them to raise prices on you, so be sure to double-check the font size 6 on page 7,421.

I think prices across the board will go up. They'll amortise it across the entire space. Part of the reason will simply be that the logistics of and potential legal issues surrounding obtaining proof of vaccination

Now the lawyers are in the C-Suite because the clinical data is showing fraud, hence the 75 years ploy by their partners in fraud the FDA. Pfizer's lawyers are getting twitchy in their Q4 earnings release.

Pfizer's lawyers are getting twitchy

We all know that lawyers love to throw everything, including the kitchen sink, into these types of documents to cover themselves, however, it gives us an inkling into what is being discussed and worried about at high levels. It seems therefore, that between Q3 and Q4 the major worries for Pfizer's lawyers include:

- further information regarding the quality of pre-clinical, clinical or safety data, including by audit or inspection.
- challenges driven by misinformation, access, concerns about clinical data integrity and prescriber and pharmacy education.
- the possibility that COVID-19 will diminish in severity or prevalence, or disappear entirely.

I think we'll get insurance companies vs pharmaceutical companies going to war in the courts. Narrative spin will no doubt continue, but all that'll happen is that trust in any of these institutions is likely to be further eroded.

How Our Fund Is Frontrunning The Economic Madness In 2022 And Beyond

- Copper - Copper prices have to rise to address a huge supply deficit looming on the horizon.

- Shipping - Shipping is vital for the functioning of the modern world, yet is priced for bankruptcy.
- Eastern Europe - Position for the long term trend of capital moving from the West to the East with Polish and Russian equities markets.
- US Dollar - We're bearish all paper currencies, but believe that the USD will outperform all others.
- Base Metals - Clean energy targets require more battery metals than existing global supply.
- Off Shore Oil & Gas - Offshore oil investment has been smashed, yet consumption continues to grow.
- Rare Earth Metals - A play on geopolitics and a cycle that should see a repricing of these commodities.
- Russian Oil & Gas - Virtue signaling abandonment of fossil fuels led by Western oil co's means Russia is taking up the slack.
- Uranium - The looming supply deficit promises to pay handsomely when the market inevitably reprices.
- Gold - Gold sees the perfect storm; the turn of a cycle, supply issues, and lack of faith in sovereign currency.
- Coal - Modern society is dependent on coal, with supply continually growing. Is there a more hated investment?
- Personal Defense - Order is breaking down in the US, and the unrest is giving us an opportunity to position for asymmetry.
- Agriculture - Lockdowns and monetary stimulus have ensured food prices will rise, providing deep value.
- Natural Gas - Supply and demand dynamics coupled with dependency from the US provides a great opportunity.
- Plus much much more...
