"Psychiatrická léčba a psychiatrické léky jsou společným jmenovatelem rostoucího počtu střelb a jiných násilných činů, které prudce rostou spolu s prudkým předepisováním psychofarmak." [Killers on Psych Drugs](#)

Zde je otázka, na kterou by měl být schopen odpovědět každý Američan: **Jaké procento vrahů – kteří masově stříleli po celých Spojených státech – užívalo silné psychiatrické léky?**

- -1 %
- **b** – 25 %
- **c** – 50 %
- **d** –75 % nebo více

Proč neznáme odpověď na tuto otázku? Copak Spojené státy nemají více masových střelb než kterákoli země na světě?

Ano.

A nejsou tyto střelby zdrojem velkého utrpení a úzkosti?

Ano oni jsou.

A nechce většina lidí skutečně vědět, proč se tito osamělí střelci cítí nuceni zabíjet nevinné lidi?

Ano, oni dělají.

Tak proč to nevíme? Proč – po více než dvou desetiletích těchto krvavých incidentů – stále nemáme definitivní, důkladně prozkoumanou odpověď na tuto jednoduchou otázku: Kolik z těchto psychicky narušených zabijáků užívalo nebezpečné psychiatrické léky?

Místo toho média provádějí linii vyšetřování, která nedokáže odhalit nic, byť jen vzdáleně přesvědčivého, o činech střelce. **Jestliže „bílá nadvláda“ nebo „nacistická ideologie“ ovlivnily vrahovo rozhodnutí vydat se na smrtící střelbu v Texasu, proč se pak nezaměřil na černošské komunitní centrum nebo židovskou synagogu?** Nebylo by to více v souladu s jeho údajnou ideologií? Ano, bylo by, což naznačuje, že **jeho údajná ideologie je symptomem jeho křehkého duševního stavu, nikoli primárním faktorem, který řídí jeho chování.** Důvodem, proč se tito lidé vydávají na šílené vraždění, je to, že jsou „poškozeným zbožím“, ne proto, že jsou ideologové. Je v tom velký rozdíl.

Proč tedy média neustále omílají tuto hloupou myšlenku, že vrahovo chování bylo ovlivněno jeho pocity o „bílé nadřazenosti“ nebo „nacistické ideologii“? Je to směšné, koneckonců vrah sám nebyl běloch ani jeho oběti nebyly rasově zaměřeny. Byli to jen náhodní kolemjdoucí, kteří se procházeli nákupním centrem. Jinými slovy, neexistují žádné důkazy, které by podporovaly případ, který média provádějí. Ale – tady jde o to – média se o důkazy nezajímají, protože **jejich skutečným cílem je prosazovat politickou agendu zaměřenou na propojení násilného fanatického chování s rasovým uber-nacionalismem. To, o co se snaží, je vytvořit podprahové spojení mezi nevyzpytatelným chováním nelítostného zabijáka a upřímně pocíťovaným vlastenectvím**

mnoha Trumpových příznivců. Média odrážela stejné téma více než šest let, což vyvrcholilo podvodem ze 6. ledna. Toto je jen poslední opakování stejných únavných politických psychologů. Pokud by novináři mysleli vyšetřování tohoto posledního krvavého incidentu vážně, pokusili by se zjistit, zda byl vrah na radaru FBI předtím, než k útoku došlo. (jako tomu bylo v minulosti tolik masových vrahů.) Byl? Byl Mauricio Garcia na seznamu potenciálních „domácích teroristů“, který sestavil FBI? Pravděpodobně se to nikdy nedozvíme, protože by to odhalilo vnitřní fungování předního národního orgánu činného v trestním řízení, což by nepochybně způsobilo značné rozpaky. FBI se tedy chystá obkroužit vozy a zajistit, aby se to nikdy nestalo, což znamená, že velká část pravdy o této události pravděpodobně zůstane navždy skryta. Ještě horší je, že můžeme očekávat, že média budou i nadále prosazovat svou šílenou teorii, že Garcia byl „nebíly bílý supremacista“, bez ohledu na to, že toto tvrzení nedává vůbec žádný smysl. Takto to sarkasticky shrnul analytik Michael Tracey:

┆ Pokud je nebělošský „bílý supremacista“, znamená to, že věří ve svou vlastní vrozenou rasovou méněcennost? @mtracey

Nechte na Tracey, aby odhalila imbecilitu memu, který se vzpírá rozumu, ale na kterém média lpí jako na Svatém grálu. Je skutečně šokující, že kdokoli může brát tento typ verbálního hucksterismu vážně, když ve skutečnosti celá věc s „nebílou nadřazeností bílých“ je jedním z nejabsurdnějších výmyslů všech dob. Je to čistý blábol. Kde bychom tedy měli hledat odpovědi? Kde můžeme najít racionální vysvětlení těchto sporadických násilných činů?

Je jen jedno místo, kam se můžeme podívat; na duševní stav osoby, která trestný čin spáchala . Tím musíme začít. Chceme-li porozumět tomu, co může vést k zabíjení náhodných lidí ve škole nebo nákupním centru, musíme vědět něco o psychologii pachatele. Naštěstí byly na toto téma napsány svazky respektovanými odborníky, kteří toto téma prozkoumali, prostudovali data a vyvodili své vlastní informované závěry. Podívej se:

Téměř 17 % Američanů užívá **psychiatrické léky s vedlejšími účinky, jako je agresivní chování, hněv nebo násilí a jednání na základě nebezpečných popudů ...**

Psychofarmaka sotva pomáhají, když mezi jejich vedlejší účinky patří zhoršující se deprese, nová nebo zhoršující se úzkost, neklid nebo neklid, záchvaty paniky, nová nebo zhoršující se podrážděnost, agresivní chování, hněv nebo násilí, působení na nebezpečné impulsy , extrémní zvýšení aktivity a mluvení (mánie) a další neobvyklé změny v chování nebo náladě.

„Spíše než aby psychotropní látky pomáhaly jednotlivcům, odcizují je a tlačí je do stále více potenciálně nebezpečného chování,“ říká prezidentka floridské pobočky CCHR Diane Steinová.

Tato situace byla tak hrozná, že v roce 2004 vydala Federální protidrogová správa varovnou nálepku „černá skříňka“, která uváděla, že užívání určitých **antidepresiv k léčbě depresivní poruchy u dospívajících může zvýšit riziko sebevražd, vražd a jiných násilných činů. .**

Studie s názvem Léky na předpis spojené s hlášenými násilími vůči ostatním... prohlásila... V 69měsíčním sledovaném období jsme identifikovali 484 hodnotitelných **léků, které představovaly 780 169 hlášení závažných nežádoucích účinků** všeho druhu.... **Případy násilí zahrnovaly 387 zpráv o vraždě, 404 fyzických útoků, 27 případů naznačujících fyzické týrání, 896 zpráv o vražedných představách a 223 případů popsanych jako symptomy související s násilím.** „Psychiatrické drogy a vedlejší účinky – nespátřená ruka za násilím v Americe“, Občanská komise pro lidská práva

Toto jsou oběti střelby v Texas Mall

Všechno to zní velmi vážně, že? Zní to jako něco, čeho by si politici měli být vědomi, aby mohli zpřísnit předpisy pro tyto potenciálně smrtelné léky. Také to zní jako něco, co by se farmaceutický průmysl snažil udržet mimo noviny, aby lidé neviděli souvislost mezi těmito léky a chaosem, který produkují. Jednoduše řečeno, pravda se skrývá kvůli moci a ziskům. Co je ještě nového? Zde je další pozadí z jiného článku:

Rostoucí počet školních střelb a dalších střeleckých řádění se dopouštěli jednotlivci pod vlivem psychiatrických drog, o nichž je známo, že způsobují mánie, psychózu, násilí a dokonce i vraždy, nebo v odvykání od nich. Vezměme si tento seznam 13 masakrů za posledních zhruba deset let, jejichž výsledkem bylo 54 mrtvých a 105 zraněných – a to jsou jen ty, kde jsou známé psychiatrické léky. V jiných případech byly lékařské záznamy zapečetěny nebo pitevní zprávy nebyly zveřejněny nebo v některých případech nebyly provedeny toxikologické testy za účelem testování na psychiatrické drogy nebo nebyly zveřejněny....

Vzhledem k rostoucímu seznamu střelců, kteří užívali psychiatrické léky, vzhledem ke skutečnosti, že 22 mezinárodních agentur pro regulaci drog varuje, že tyto léky mohou způsobit násilí, mánie, psychózu, sebevraždy a dokonce i vraždy, a vzhledem ke skutečnosti, že byla právě zveřejněna rozsáhlá studie potvrzující tyto drogy vystavují lidi většímu riziku, že se stanou násilnými, tvrdí CCHR International: **„Jakékoli doporučení pro intenzivnější ‚léčbu‘ duševního zdraví, což [nevyhnutelně] znamená, že těmto [psychiatrickým] drogám nasadí více lidí a více dětí, je nejen nedbalé, ale zvažující možné následky, zločinci.“** („Skutečná lekcce Columbine: Psychiatrické drogy vyvolávají násilí“)

Tak proč neoslovíme slona v místnosti? Existují nějaké pochybnosti o tom, že střelec v nákupním středisku v oblasti Dallasu byl duševně labilní, pravděpodobně měl v minulosti nějaké poradenství a léčbu a mohl užívat silné psychiatrické léky? Kdybyste byl profesionálním novinářem, není to místo, kde byste začali své vyšetřování, spíše než abyste se snažili dát dohromady nějakou přitaženou za vlasy na základě fotografií nacistických memorabilií na izolovaném příspěvku na sociální síti?

Média a učenci v kabelových zprávách nám opakovaně říkají, že „problémem jsou zbraně“, ale není případ silných psychiatrických léků stejně přesvědčivý? Stojí za zmínku, že zbraně samy nestřílí a že ze zbraní se obvykle nestřílí do davů, pokud je neovládají nestabilní, vyšinutí lidé, kteří – častěji než ne –

mají nějakou vysledovatelnou mentální historii, ve které byli diagnostikováni, poradili a léčeni. Vše, co chceme vědět, je, jaké léky jim byly předepsány, abychom mohli lépe monitorovat jejich užívání s cílem chránit veřejnost. Bohužel **média nejsou ochotna tyto informace poskytovat z důvodu zásadního střetu zájmů. Platí je farmaceutické společnosti.** Zde je více z článku Americké psychiatrické asociace:

Souvislost mezi několika typy psychotropních léků a násilným chováním vůči ostatním byla zdokumentována v nedávné studii...

Ve studii zveřejněné 15. prosince 2010... Zjistili, že během sledovaného období bylo u 484 drog hlášeno 780 169 závažných nežádoucích příhod toho či onoho druhu a z těchto závažných nežádoucích příhod bylo 1 937 násilných činů.

Definovali násilnou událost jako jakoukoli případovou zprávu obsahující jednu nebo více z následujících položek: vražda, fyzické napadení, fyzické týrání, vražedné myšlenky nebo symptomy související s násilím....

"Navíc antidepresiva vykazovala trvale zvýšené riziko, dokonce i ve srovnání s antipsychotiky a stabilizátory nálady." . . . "

Paul Fink, MD, odborník na studium násilného chování a bývalý prezident APA, komentoval. „Mohu vám říci, že **jako psychiatr, který prakticoval dlouhou dobu, jsem si nebyl vědom toho, že [vareniklin a antidepresiva] byly spojovány s násilím vůči druhým. . . . Psychiatři a odborníci na duševní zdraví si musí být této asociace vědomi.**“ Studie neměla žádné vnější financování." Několik léků spojených s násilnými činy.

Mějte na paměti, že normální, dobře naladěni muži, kteří jsou šťastně ženatí a výdělečně činní, se nedopouštějí náhodného vražedného násilí. Jsou to lidé, kteří mají vážné psychické problémy, kteří možná vyhledali odbornou pomoc a kterým byly (často) předepsány různé psychiatrické léky.

Tyto léky – ačkoli jsou pro mnohé prospěšné – mohou u malého procenta uživatelů vést k nadměrnému násilí. Veřejnost musí o těchto drogách vědět, aby mohla vyvážit jejich přínosy a rizika pro veřejnou bezpečnost. Dosud se nepřipustilo, že tato rizika vůbec existují. Místo toho byla veškerá vina připisována zbraním, což pouze podpořilo větší nedůvěru jak k médiím, tak k politickému establishmentu. Ve skutečnosti většina majitelů zbraní nyní věří, že politici se o veřejnou bezpečnost vůbec nezajímají, ale pouze ji využívají jako platformu pro prosazování svých vlastních úzkých zájmů. Zdánlivě mezi tyto zájmy nyní patří zrušení druhého dodatku, po kterém následuje odzbrojení amerického lidu. To je cíl a většina majitelů zbraní ví, že to je cíl. Zde je jeden poslední klip z dopisu editorovi s názvem Psychiatrické drogy jsou za násilím od Douga Dalea:

Zatímco Kongres, obklopený ozbrojenými strážemi, detektory kovů, řetězovým plotem a polovojenskými silami, debatuje o porušování ústavního práva soukromých občanů na držení zbraní, není načase, aby se skutečně zabývali hlavní příčinou těchto masových zabíjení?

Tyto události byly neslýchané, dokud před několika desetiletími nezačal FDA schvalovat další psychiatrické léky. Od roku 2004 do roku 2009 výzkumníci, kteří vstoupili do systému hlášení nežádoucích událostí FDA, odhalili, že 1 537 případů násilí bylo spojeno s 31 různými typy psychiatrických léků . Jiné odborné studie dospěly k závěru, že pacienti neměli vražedné myšlenky až po užití těchto léků. **Od roku 1992 do roku 2017 bylo s těmito léky spojeno 37 školních střelb. Ve zprávě předložené Senátu v roce 2014 se odhadovalo, že 90 % školních střelců užívalo antidepresiva. Je zřejmé, že to není duševní zdraví člověka, ale drogy, které způsobují toto násilí.**

Farmaceutická lobby přispívá stovkami milionů dolarů členům Kongresu, kteří vytvářejí federální zákony. **Kdo popře, že tyto drogy jsou hlavní příčinou masového zabíjení?** Budou to nevzdělaní političtí fanatici popíjející elixír kontroly zbraní, politici přijímající příspěvky na kampaň od farmaceutické lobby, farmaceutického průmyslu a/nebo lékaři prodávají tento jed veřejnosti, a pokud ano, proč?...

V roce 2001 výrobce léků stáhl z trhu lék na cholesterol, protože byl spojen s 31 úmrtími. V masovém zabíjení jsme daleko za tímto číslem.

Kongres musí zakázat držení zbraní komukoli, komu jsou předepisovány tyto léky, a pak přinejmenším učinit z federálního zločinu vypisování nových receptů. Jinak lze jen konstatovat, že Kongres by se mohl méně starat o to, kolik vedlejších škod způsobí.

Pokud chceme zastavit masové střelení, musíme přísně regulovat psychiatrické léky, které je způsobují.

Why do cops like the one pictured above need “assault weapons”?

Gov. Inslee said “These weapons of war, assault weapons, have no reason other than mass murder, Their only purpose is to kill humans as rapidly as possible in large numbers” when he banned them for everybody *except the cops* and except for *his own security detail*.

Are we to conclude, then, that the cops are at war, and their job is mass murder?

It's been long known that these SSRI drugs have paradoxical side effects. But money talks.

I think violent culture and media + social alienation + easy drugs = crazy people acting up on their worst urges.

It is almost always migrants or loners, too — people socially alienated. In many cases now they are “gay, transgender or gender-fluid”, that is, people with severe mental issues. The drugs do not help.

I knew a couple of people on such meds. One of them attempted suicide, cut all contact with his family, and became randomly aggressive. And that was after the medications, not before.

4. RoboMoralFascist 1st says:

Of course there is a link between mass shootings, prescription drugs and psychiatrists.

Therefore it is another vastly unknown correlation and unreported story in the American MSM.

It is another feature characteristic of your anti-Christ culture.

| So, why aren't we addressing the elephant in the room?

Blame the Drug War. For once, it's totally complicit.

The only one-stop substance that treats depression 100% is opium. So go grow opium poppies in your garden and tell everyone you're going to treat your depression with Mother Nature and watch how fast the DEA sticks you into a federal prison.

Before the 1914 Harrison Act there was no Drug War. There was also no "drug abuse". If you wanted it you got it at an apothecary and if you didn't, you were safer because people who needed it COULD get it.

When Nixon expanded it to include America's own gestapo, the DEA, things got worse and nastier. Then Reagan expanded it further to intimidate doctors. One of the most respected specialists locally was threatened with felony arrest for treating a patient for pain. Doctors now pretty much have to answer to a police state, believe it.

The idea Americans live in a free country is contradicted by everything in public life, now including random bullets from people who would be safely stashed in opium dens a couple hours a week if there was even a small amount of * **actual** * freedom.

I'm an investigator for governmental and nongovernmental entities and part of my work involves looking into a subject's mental health issues and/or mental health history.

I wish I had a dollar for every case I've seen where mere recreational marijuana use develops into psychosis/psychotic episodes and/or assorted schizoaffective disorders.

Perhaps the craziest part of it all is that there seems to be a deafening silence on the issue and the public has zero knowledge of this unfolding slow-motion societal catastrophe.

In my prior profession as a law enforcement officer there wasn't a day that passed in which I did not have to deal with people who were either crazed out of their heads, or so despondent that they wanted to kill themselves. Every one of them were on some kind of psychotropic drug that was medically prescribed.

Years ago, when it finally dawned on me how widespread this problem was, I asked my beat partner: "Good Lord, is everyone on some kind of mental drug?!"

Time after time, I discovered some of the same underlying themes: (1) They had almost no coping skills to deal with difficulties in life. (2) Almost all of them, seemingly, were alcoholics. Alcohol abuse ran through almost all of these folks. (3) Their food habits were atrocious. They survived off of processed carbs, sugary drinks, and fast food. (4) Most of them already had a narcotics addiction, and any prescribed medication that was intended to 'balance' them out only made things worse. (5) These folks were already dysfunctional. Their personal lives were already a complete wreck.

I believe all of these together had a dramatic effect on their outlook and mental stability. Depression was high among them, and so they would seek relief from some pharmaceutical pushers (known as medical doctors) who would prescribe them psychotropic drugs that only served to exacerbate their condition.

Few people stop to consider the long term effects this will have on future generations. What new autoimmune conditions will arise? What new diseases will come forth? How screwed up hormonally will the coming generations be? What kinds of birth defects will we have to deal with? What new mental problems will have to be addressed?

These are the problems that we will have to face if we enact laws that allow everyone to smoke, ingest, and shoot-up any strange chemical concoction they might want.

Even though the U.S. government claims to have fought the “drug war,” the truth is that the government fought it like they do all their wars – namely, with one hand tied behind their back, with glittery campaigns that prove empty, and with a whole lot of wasteful taxpayer spending.

Just as Americans thought they could endlessly party, have sex with no consequences, engage in excessive materialism, print money like there’s no tomorrow, and continuously warmonger abroad, but now realize that the proverbial chickens have come home to roost – so also Americans are going to be forced to realize that a nation doped up on either legal or illegal drugs will only destroy itself and any future generations that arise.

No sane nation allows itself to commit suicide under the banner of “freedom” and “personal liberty.”

Whatever is happening with the Mass Shootings, it **cannot** be on account of too many rapid-fire weapons in the hands of too many people. So the search for other causes began several years ago.

What's behind the dubious claim that psychiatric drugs fuel mass shootings?

<https://www.politifact.com/article/2019/aug/16/whats-behind-dubious-claim-psychiatric-drugs-fuel/>

This first link highlights in bold print two items:

1. The Church of Scientology hates psycho-drugs, and pushes the the notion psychiatric drugs are the root cause for the mayhem.
2. An Obama death squad murdered whistleblower John Noveske for exposing the psycho-drug >> mass shooting connection. Regarding the latter:

But an Oregon State Police report of Noveske's Jan. 4, 2013, fatal automobile accident makes no mention of suspected foul play. The police report said Noveske lost control of his car while traveling on an Oregon highway before striking two large boulders. The vehicle rolled and ejected Noveske, who according to police, was not wearing a seatbelt.

Many U.S. Mass Shooters Had Untreated Mental Illness: Study

<https://myhealth.ucsd.edu/RelatedItems/6,1653363897>

That turns the argument on its head – mentally ill people are engaging in mass shootings because they **aren't** taking psycho-drugs to treat their condition.

A more general story:

The NRA theory that drugs cause mass shootings simply doesn't make sense.

<https://www.psychologytoday.com/us/blog/take-charge-bipolar->

[disorder/201805/why-psychiatric-drugs-dont-cause-mass-shootings](#)

Another article from Psychology Today closes with this:

I further contend there are powerful, divisive, and negative social forces at work today that fuel the increase in mass public shootings. These factors include but are not limited to: financial and healthcare fears, a declining belief in the American dream, distrust of the government, racism, xenophobia, religious and gender biases, hate crime, domestic terrorism, and near-constant war since 2001. Political and social divisions fueled by seemingly ubiquitous hate speech across media platforms over the last few years have created an environment where violence is seemingly inevitable.

The above factors have led to fear, alienation, powerlessness, rage, and nihilism for millions of people in our country. Tragically, but predictably, an increasing number of Americans are striking out in horrible, public acts of mass violence against innocent strangers that are driven by rage and unfounded retribution.

The personality type who is willing to murder random strangers would be more than happy to expand his body count. This is one of several reasons Nuclear Electrical Power Generation is just too dangerous for a society such as the one we currently live in. An unbalanced person (or group of such people) with enough cunning and patience could kill hundreds of thousands instead of dozens.

<https://www.psychologytoday.com/us/blog/wicked-deeds/202206/the-real-reason-mass-shootings-are-the-rise>

A modern multi-racial/ethnic/cultural/religious/gender non-society for a normal person not involved in mass propaganda acts like a planetary zombie army. It is surprising that for random mass killings of zombies, people do not use weapons of mass destruction, or at least artillery and tank shells or trucks with simple and powerful explosives. It seems that normal people are waiting for the adeptus astartes, which makes a complete exterminatus, but the god-emperor died, and all his children became possessed by demons.

It is obvious that deceitful China is spreading its totalitarian influence on everyone else – remember their forcible vaccination of people like cattle from their Chinese flu. The only way to stop our destruction is to destroy China and establish a direct, fully transparent democracy without any intermediaries – kings, presidents, parliaments, secret services – information technology allows us to do this.

...whether the killer had been on the FBI's radar before the onslaught took place. (as so many mass killers have been in the past.) Was he? Was Mauricio Garcia on the list of potential "domestic terrorists" compiled by the FBI?

Gee Mike, you're missing the elephant in the room. Have many of these shooters been "on the FBI's radar" because they actually groomed them, supplied them and set them up? Let's talk about that.

— In a nation of over 340 million people, how is it that the FBI would have had prior contact with a solid number of these killers? So random, so miraculous. No, not likely either of those.

— I don't have evidence or even a link to provide but, after the Parkland shooting (talk about an event that screamed 'false flag'!) I was reading some comments about there being a feeder network of psychological professionals, and even some school counselors, who provide dark forces (FBI?) with names of young, vulnerable, likely already unstable, people. Mostly males, obviously.

Then, who knows how the program works for grooming and training them but, think MKUltra mind control and, yep, plenty of psychotropic drugs. In the past, many of the young shooters captured alive had bug eyes – really obvious – and that's, apparently, a side effect of one of the MKUltra drugs. Notice, in the last few years, how they always wind-up dead now?

— The authorities sure are suspiciously holding back the "manifesto"...lol, don't we all have one of those; eyeroll?...of the Nashville shooter. Could it be because she wrote about HOW she got radicalized? About being recruited, trained, drugged, etc? If they ever release it, you know it will have been massively rewritten.

Just saying, you missed *the biggest probable angle in many of these cases*. Also, notice how they are now happening constantly since the corruption heat has been turned-up to high on the Brandon Mafioso Clan. Likely not a coincidence.

— Lastly, getting kids on prescription drugs is very common now and **parents often get paid monthly \$\$ by Uncle Sam if they have their kid(s) on ADD, ADHD or other drugs**. The pop culture name for it is ‘crazy checks’ and those receiving them have no embarrassment about it. They ask each other if they get them. I see Urban Dictionary has scrubbed some of their prior, more accurate, definitions about them.

[https://www.urbandictionary.com/define.php?](https://www.urbandictionary.com/define.php?term=crazy%20checks)

[term=crazy%20checks](https://www.urbandictionary.com/define.php?term=crazy%20checks) Some other sites have too. This forum page is from 2008 and talks about crazy checks.

<https://www.abovetopsecret.com/forum/thread365083/pg1>

A local teacher I know told me about them in 2017.

When I was a kid in the mid 1960s, guns were in every household rarely locked up. Kids would come home from school, Mom would serve milk and cookies. Then a group of kids would go out and plink tin cans. They'd carry all manner of guns on the street. The littlest ones would tag along with their 22s.

There wasn't ever a mass shooting – never ever.

Today guns are locked up, controlled, and few homes have them. Yet – mass shootings happen routinely.

All these mass shooting stories are so tiresome. Each provokes countless articles by good writers like Whitney discussing the underlying causes, is it meds, alienation, structural social problems, etc?

I've decided to stop giving any of them any attention. I assume, from the get go, that they are made for tv dramas. You want to analyze them? Fine. But understand that your essay is a work artistic criticism – look at the holes in the story these writers wrote, the camera contradicts the narration, the narrative contradicts the story, etc. The problem with these takes is that they assume the subject being discussed is real and not a fictional drama.

Many critics are right that these dramas are used to push an agenda. But every critical review that operates from the point of view that the drama is an IRL event has already conceded to those pushing the nefarious agenda.

You have allowed them to set the terms of the debate.

At this point, after all the lies the TV and media outlets have told, the most reasonable approach to take is that all these stories are made up and it is on the shoulders of those telling them to convince us they are not making them up. If I don't witness it with my own eyes, in real life, I refuse to even start a discussion on whether the event justifies the curtailment of my rights for "safety."

It's actually shocking that anyone can take this type of verbal hucksterism seriously when, in fact, the whole "non-white white supremacist" thing is one of the most absurd concoctions of all time. It's pure gibberish.

My guess, is the people pushing the "white supremacism" rhetoric are projecting envy. They, whether intentional or not, are assuming maybe there's a class of "self hating minorities" who realize what will happen as the White population continues to proportionally decline.

Ironically, AFAIK, anti-psychotics are more effective than SSRIs, and are one of the "pressure release valves" for the emptying of insane asylums.

If we want to stop the mass shootings, we need to strictly regulate the psychiatric medications that are causing them.

LOL. If we want to stop the mass shootings we need to be clear about who is staging them. The actual brain washed and mind controlled shooters are the end effect, but the origins of this attack against our culture begins far away.

We will never be able to stop the shooter if we can't neither identify who is programming and sending them out nor what their real agenda is.

One thing should be obvious though: The shootings are part of the same agenda as wokeism, climate hysteria, mRNA gene therapy, CBDC and never ending wars.

Antidepressants are not the problem but the indiscriminate prescribing of them may be.

It is essential that the doctor have a complete social and psychological study of the patient before writing a script. Shortcuts in mental health treatment are dangerous.

Many of the mass shooters were abused, neglected and bullied as children, full of rage and paranoid ideation which might have become latent. When you give them a SSRI or any other CNS stimulant, there is a risk of causing that rage to surface and be acted out in the most violent way.

I would bet that many more shootings happen in cities than in rural areas.

Nothing better calms the soul than spend some time in the nature. Fishing and camping comes to my mind. Drugs are no good because they last for period of time in body and when they expire from the body and the persons is even more depressed.

I also would say that people in cities should not have guns.

Particularly they should not have automatic long guns.

Second amendment was targeted for protection of nation for defense from outside enemy.

So it should be void. There is no more outside threat to the nation.

“Here’s a question that every American should be able to answer: What percentage of the killers—that have carried out mass shootings across the United States—were on powerful psychiatric medications?”

The same amount who are involved in car accidents and have worn-out tires?

The authorities never look at the obvious, whether it is mass shootings caused by mind altering drugs or poorly maintained cars or Covid deaths not caused by Covid infections..

Another possibility is environmental pollutants from the food and water that we ingest daily.

“the whole “non-white white supremacist” thing is one of the most absurd concoctions of all time. It’s pure gibberish”

No.

This is a tradition especially in South America where the racial hierarchy is ancient, being the natural consequence of the miscegenation that has been imposed on this unfortunate continent.

There are even “gangs” that mix pseudo Nazi ideology (no more serious than hells Angels, aryan brotherhood or ukronazis idiocy), veneration for the Brazilian death squads, and who recruit according to skin color.

And even though they would never be considered “whites” by genuine Europeans, they really do consider themselves as whites, just like this Allen shooter (who must have known this type of gangs).

The fact that leftists are so happy to use this ambiguity does not change the fact that it is a reality. I had seen a documentary at a time when documentaries were reliable on this subject of the South American neo Nazi gangs. I’m not making it up.

The shootings will continue until the gun laws are changed in accordance with Cabal desires.

The real question: Why are they so intent on taking our guns? What are they planning to force on us that they are afraid we would use guns to stave it off? Make bug-eating mandatory? Forced military conscription? Forced vaccines at gunpoint? Taking away private cars and forced bus-riding for the lower 90%? Forced sterilization for couples with more than 1 child? They are after guns for a reason.

What percentage of the killers—that have carried out mass shootings across the United States—were on powerful psychiatric medications?

What percentage of the killers—that have carried out mass shootings across the United States at the behest of a hostile elite that controls it —were on powerful psychiatric medications given to them by said elite's stooges in the federal government?

FIFY

The most violent government on the planet, has the most violent people as it's subjects. Add in some psychotropic drugs, and there's your answer.

*The most violent race in the history of the world has groomed the most violent people through a sinister program of non-stop propaganda, brainwashing, and psychotropic drugs to help carry out its destructive mission.**

FIFY, Again

In short, **Destructive Mission Made Easy! Just Add Psychotropic Drugs!**

Chapter 17 • The Destructive Mission

The study of hundreds of volumes, during many years, gradually brought realization that the essential truth of the story of Zion is all summed-up in Mr. Maurice Samuel's twenty-one words: "We Jews, the destroyers, will remain the destroyer forever ... nothing that the Gentiles will do will meet our needs and demands."

At first hearing they sound vainglorious or neurotic, but increasing knowledge of the subject shows them to be honestly meant and carefully chosen. They mean that a man who is born and continues a Jew acquires a destructive mission which he cannot elude. If he deviates from this "Law" he is not a good Jew, in the eyes of the elders; if he wishes or is compelled to be a good Jew, he must conform to it.

This is the reason why the part played by those who directed "the Jews" in history was bound to be a destructive one; and in our generation of the Twentieth Century the destructive mission has attained its greatest force, with results which cannot even yet be fully foreseen.

This is not an opinion of the present writer. Zionist scribes, apostate rabbis and Gentile historians agree about the destructive purpose; it is not in dispute among serious students and is probably the only point on which agreement is unanimous.

All history is presented to the Jew in these terms: that destruction is the condition of the fulfilment of the Judaic Law and of the ultimate Jewish triumph.

MW: *“Congress needs to ban gun ownership from anyone being prescribed these drugs,If we want to stop the mass shootings, we need to strictly regulate the psychiatric medications that are causing them.”*

And there it is, once again, at the Unz review, yet another inane call for more government regulations as cure for whatever ails us.

In Whitney's fantasy world, [and that of 99.9% of other Unz writers and commenters], the government is going to heroically march in and “fix” this problem [which it caused in the first place], just like its “fixed” all the other problems it causes, [eg: war, inflation, poverty, racial division, environmental destruction/pollution etc. etc.], right Mike?

This “just” in:

“Everything government touches turns to crap” Ringo Starr

“The kind of man who wants the government to adopt and enforce his ideas is always the kind of man whose ideas are idiotic” H.L.Mencken

“Government is a disease masquerading as its own cure” Robert LeFevre

“The government is good at one thing. It knows how to break your legs, and then hand you a crutch and say, “See if it weren't for the government, you wouldn't be able to walk”. Harry Browne.

In his book *Spark: New Science of Exercise and the Brain*, John Ratey, M.D., who is professor of psychiatry at Harvard Medical School, says that he recommends to his patients hard cardio exercise over any meds when dealing with issues involving anxiety and depression. And that exercise levels out neurotransmitters in the brain more perfectly than any anxiety/depression medication can and that the latter merely causes *another* chemical imbalance in the brain which requires *another* drug to deal with the new brain chemical imbalance.

Couldn't it be that the type of people who have it in them to commit a mass murder would be on these kind of drugs to begin with? They were already identified as mentally unstable before they started taking the drugs. A solution would be to greatly expand our mental hospital system. If mass shooters were institutionalized instead of roaming free most of these shootings could have been avoided.

It's unfortunate people listen to pharma con 'doctors'. ssri's and other drugs, not good. Better to use natural if anything, herbs, or look at b vitamins, though not eat food with 'added vitamins', cereal etc, a con to dump iron in us, don't eat extra iron, makes us more magnetic, for electro schemes. Should ask why most 'large' brands' have been doing it. It isn't for our benefit.

Don't think any shootings have been real, remember over half million cons in kabal, can put on acts, and their con spawn also, in skools, steering other young people, and as people go along, 'locking down' skools, and pushing bogus anti 'terror' bs, lets them take away our own power.

In article – ' It sounds like something that policymakers should be aware of so they can tighten regulations on these potentially-lethal medications. It also sounds like something that pharmaceutical industry would try to keep out of the newspapers so people don't see the connection between these drugs and the mayhem they produce. Simply put, the truth is being hidden for power and profits.'

'policy govt state cons handed pharma cons hundreds of billions over decades, same cons. Look at covid vaxs con. On other point, pharma cons don't actually need profit, they're same con kabal as money printers. money means nothing, they have weapons now. The drugging as many as possible, has meant more femy folowers, so agree power is the scheme. Half the problem is people going along, not keeping whole. Its on every person to do a part against schemes.

Toward that, should rethink – 'Keep in mind, normal, well-adjusted men who are happily married and gainfully employed, do not commit random acts of homicidal violence. '

Actualy thats as bad as drugging, supposed 'well adjusted men' and 'gainfully employed' –no one should be 'adjusted' to anything going on the last two centuries, and 'gainfully employed' – most 'jobs' are a cog in the cons wheel, not doing anything for freedom or earth, which though not robbing others is good, failure to make effort to stop the cons, isn't, ignoring destruction and paying tax to cons, isn't, and on violence, 'random' acts bad, but physical force for good purpose is good. Suggest make note.

Have to snap out of false femy sub-urb image, false focus pushed by the cons and teevee etc since the fifties. Should have been living different, tribes, weapons, not fake money, and shoving back 'state' cons etc. De-feminize.

The situation on pharma drugs, if we shared info around us, could make a diff, in more people know to look at natural, and get off pharma, more could be stronger against the cons.

The cons use gang effort, counting on us to not to share info. Thing is to do opposite.

Appreciate the article.

In 2001, a drug manufacturer removed a cholesterol drug from the market because it was linked to 31 deaths. We are way past that number in mass killings.

Is that really true? Which drug was that? I wonder if the story is getting something confused.

There's no question something has changed in American society and it isn't guns. As late as the 1960s it was commonplace for American students to learn to shoot together in school. Why are the kids on so many drugs, though? Beginning with LBJ Zionist control of the USA led to increasing strain on the federal budget due to its inability to simultaneously fund both the Vietnam War and the Great Society programs. The root cause of the medication is the decline of families brought on by excessive taxation and inflation – the result of decades of policy supporting the Jewish over class and the black underclass (not to mention the totally unnecessary Hindu parasite infestation) and various foreign dependencies which are largely not worth defending at everyone else's expense. The solution is a middle-class revolt that can bring together Hispanics, whites and Orientals in the center and bring back traditional morality and a government that prioritizes normal Americans over the current freak show. I think the Mormon church is best placed to effect this change in the long run, and is certainly appropriately anti-drug.

@Lady Strange

| South American neo Nazi gangs

Nazism was always about putting the interests of the lower middle class first which is where a lot of Hispanics sit in the USA now. Fascism was also most popular in catholic countries which is also big in Latin America. Frankly, even during Hitler's time many pointed out how the typical German was brown-haired and a little swarthy, and not as white as Hitler's blond-haired, blue-eyed ideal, just as you have pointed out in the Latin American example. These comparisons miss the real point of the movement (perhaps intentionally) which was primarily class warfare of lower middles against the financial oligarchs.

In any case Germany was a much older country in the 1930s (the first Reich really did last 1,000 years and was relatively tolerant towards Jews) than the United States is now so I do not think outright Nazism is the answer. UK and Scandinavia on the other hand... could be trouble of a similar sort.

You live in a culture in which something like 60-70 million children have been killed in the womb by “mommy” since 1973. How many who survived the suction cup since 1973 were subsequently raped, maimed or murdered? The Jewnited States is a perverse society run by ((perverts)). All of the pathologies unleashed in the 1960s have come home. The bitter legacy of the 19th Amendment is now inescapable. We live in a society in which a man can have his life destroyed for asking the wrong woman out at the wrong time of month, but a tranny can rape a child in a restroom and walk free. American women burned their bras for affirmative action, but stay mum about unisex bathrooms where trannies get to pee alongside their six-year old daughters. It’s a bullshit society dominated by lies. Oh, and something else: you can guilt-trip a man, but rarely a woman. Women don’t give a shit how much the policies they favor destroy others, just as long as they get theirs. They won’t care until social decay starts causing them real pain the way it does everyone else in the family. May they suffer the equivalent of medieval torture.

@Brosi

It is quite obvious many of these astroturfed mass shootings have an agenda.

To understand this try to analyse.

Who is the sender of the message.

What is the message.

Who is the message directed at.

In Norway we had a anti LGTB shooting last summer, wich had many of the signs of a false flag shooting.

A handicapped girl was exposed at lying about being shot.

The newspapers who reported it had to admitt it publicly.

The secret police and the military intelligence are now in a conflict and blaming each other.

None of these agencys managed to expose this.

This shows to me atleast that our security apparatus is comprimised.

Anyone not seeing this can be accused of having a agenda if not outright being stupid.

There are many similarities between the suspected false flag shootings, and one similarity is that they are directed as a form of pro active meassures against what the ruling elites see as their enemies.

In Norway they have tried to connect suspected false flags shootings with naziism, nationalism, anti LGBT, islam and even christianity.

Cui bono

Operation Gladio seems to fit the bill.

Have anyone thought that people on psychiatric medication have some mental imbalance ? , some mental illness ?

Have anyone thought that in the USA , and in Europe , people demand , energically demand to the pysichatrists to be given psychiatric medication to relief school failure , academic failure , alcohol and drug abuse , adaptation problems derived from low or borderline Intellectual Cocient , marital problems, divorces , work failures , medical illnesses , life failures and even existencial emptines ?

Since the West is the best , westeners do not tolerate human limitations , and demand to be happy , demand to be medicated to have the hapiness and succes that they deserve , as the western science and governments promise to them

And now we have to read that if a moron , a deranged , a criminal , does something wrong it is the fault of the antidepressant , not of the guy that takes the antidepressant . It is pure western angelism , pure nonsense .

| So, why aren't we addressing the elephant in the room?

This is the elephant. The administration of psychotropic drugs is an exercise in medical experimentation and they do not tell you this. There are no tests to determine if your "brain chemistry" is skewed and needs adjustment, they just guess AND we do not know what really happens because this is a totally uncontrolled experiment—one of the longest running ever. So many side effects and so little time—sigh.

Oath of office – “...enemies FOREIGN AND DOMESTIC.”

Please show us the section in the Second Amendment that refers to only an ‘outside’ enemy.

From my perch on this sordid earth, there are plenty of outside threats to this nation. Those threats were created by our government’s reckless foreign policy for decades.

But they can’t hold candle to the threats posed by our own government – against US.

But by all means feel free to be defenseless.

When our disastrous and violent government sets the pace, you would expect this type of outcome. And taxpayers continue to pay for this illegal, treasonous and murderous government and especially its leaders who can hardly be considered “human”. And americans continue to look the other way and ignore the obvious because of the blood-stained luxuries of life in the US that are accepted without an afterthought.

Let’s see how many christians seeking eternal heaven with their creator begin to refuse to pay taxes and turn their backs on government mandates. Along with abortion, you guys are on the hook.

I haven't read this article, yet, but my answer to the question is YES, a thousand times yes.

I have family experience with this. As parents, we have gone through years of hell because a child of ours started taking these drugs prescribed by a doctor at her college. She came home and the first doctor we took her to after being assaulted by behavior that was 180 degrees from her behavior up to that time, the local doctor said it was the SSRI shit that was making her crazy.

I won't describe the treatments and the various diagnoses that came from multiple experts before she finally became capable of living with us in peace. It ruined her career and much of her life, decades of her life. I know we're not alone.

Amazingly, the NYT identified these drugs as dangerous twenty-five years ago and had regular articles on their danger.

Those SSRI's were cooked up in hell by the lowest evil spirits.

Thanks for this article on an important topic that merits honest public debate. It strikes me that bemoaning that there is a “mass shooting” every day while there are almost four hundred million guns in the country fails to notice that these horrific incidents are literally less than one-in-a-million events. It seems a reasoned, not-hysterical approach might be to be pleased that they are so rare, rather than allow one’s emotions to be manipulated by sensationalized media coverage and the sleazy self-seeking politicians on both sides of the firearms debate. Anxious, frightened people are always the easiest to control, after all. Given the unspeakably taboo yet painful reality that state-sponsored violence is inherent in imperialism, and exerts a toxic influence throughout the culture, it could be seen as a testimony to the decency of the American character that so few of us go over the edge, “medicated” or otherwise.

Some nice swings by Mike Whitney and others at the wrong ball.

The mental health crisis in the United States began after Pres. Ronald Reagan's Omnibus Budget Reconciliation Act of 1981 repealed most of the Mental Health Systems Act.

In 1981 President Ronald Reagan, who had **made major efforts during his Governorship to reduce funding and enlistment for California mental institutions**, pushed a political effort through the U.S. Congress to repeal most of MHSA. The MHSA was considered landmark legislation in mental health care policy.

[my bold]

https://en.wikipedia.org/wiki/Mental_Health_Systems_Act_of_1980

As a result, almost all of the community mental health clinics, insane asylums and nut houses in the United States were defunded and ultimately shut down, giving lunatics everywhere free reign to unleash their craziness on the community without much further guidance or monitoring beyond dosing them with psychoactive drugs.

The most obvious thing that should be investigated regarding mass shootings, the use of drugs, both legal and illegal, will never be investigated because it will prove the correlation. First, we must understand, our rulers don't want to fix the problem of mass shootings. They just want to disarm law abiding White people so we have no way to defend ourselves from their black pets. And when the time comes to drag us from our homes, we will have no way to resist.

medical doctors) who would prescribe them psychotropic drugs that only served to exacerbate their condition

In fairness to the doctors the clients lie to them about their drug and alcohol use, pretending to be clean when in fact they're using on top of the psychotropic drugs. Obviously this thwarts the intended treatment plan. What the results are of this cocktail of legal and illegal drugs can't possibly be good but it stems from the basic dishonesty of the client and the gullibility of the doctor who has only the patient's word of honor to go by. The marijuana is strong and available in abundance, psychedelics are floating around, stimulants and old fashioned booze are around as well as who knows what else. Also, don't overlook the fact that a lot up people like the feeling of being jacked up and acting out. It gives them a rush and they repeat it even though it has inherent dangers for them.

It's a mistake to lump all these psychotropic drugs together. Whitney pointed out that Mood Stabilizers (such a Lamictal) do not have the same elevated risk profile associated with anti-depressants. And all AD's are not the same either. I'm not exaggerating to say that being prescribed a mood stabilizer saved my life when all else failed.

By all means, every one of these spree killers should be checked for AD's in their system and isolate what kind they're taking, just like they are checked for alcohol and illegal drugs.

The worst thing you can do is make AD junkies withdraw from the drug cold turkey. They must be slowly weaned off, a project which must be supervised by a professional and could take months to complete. Don't throw out the baby with the bath water.

You're right that most people don't know the facts you just stated, and thank you.

But Reagan has not been governor of California for nearly half a century already. The federal legislative repeal you mention took place over four decades ago.

So it's good to know what Reagan et al. did way back then. But that was a long time ago. And Democrats have had large majorities in both houses of the state legislature in California for a long while now.

We Californians also have public-initiated initiatives, known as ballot propositions. Lotta years to get this on the ballot, yet nothing.

Was the entire state of California, and the entire USA, too fucking mentally retarded to change things over all these years since bias ? Just keep living and wallowing in shit and blame someone long gone?

Few thoughts on comment forty, what happens when they cut off the drugs, no warning, and cut money, no 'weaning. They already do mass to cause suffering, obviously, false 'wars, 'covid', suicides, vaxs deaths etc. They want people drugged, so don't have as much fight instinct, and cutting off is also a weapon. Just think the last thing anyone would want is to be hooked on anything connected to pharma cons. The number of people on mental pharma is indication of not recognizing the cons are in everything. The homeless, how many because of being unbalanced by pharma drugs. Its a lot to recognize the many angles the cons use to weaken -while pretending to 'help', how sick they are, though by now more should know.

Think for many reasons better other choices or focus.

Alex Berenson, who is best known for publicizing the extreme dangers of the Covid shots, has also done a deep dive into the dangers of cannabis. Today's cannabis is not your parent's cannabis from the 60's and 70's. It is MUCH more potent and associated with the development of schizo behavior and other anti-social problems.

Legalizing all drugs, as many libertarians advocate, is no solution. As studies have shown in European countries who tried it (then rejected it), it only makes the problem worse.

@RockaBoatus

My brutal old-man was a violent predator. Throughout the formative years, in fits of spontaneous rage, he'd beat me and my older brother, giving no quarter. A childhood of sustained physical and psychological trauma.

Years later, in an exam with a VA primary care physician, I was told that I had every PTSD symptom in the book. And was offered both psychiatric counseling and pharmaceutical medication.

I'd ridden life's roller-coaster and burned every bridge I ever crossed. But in those special times when that cold gun was on my temple or that warm rope was around my neck, an unexplainable intervention occurred.

Mysterious encounters with guardian angels or spirit guides, and subtle requests that I reconsider the suicide, and not to give up, albeit seemingly at the rock bottom of this world's abyss.

And so I did. And to this day, I believe it was those ethereal angels or guides who arrived, at the darkest hours, to save me from myself. And you know what? Literally, life got an order-of-magnitude better each time, like some kind of miracle.

And although I didn't dare relate those mystical experiences to the primary care physician, I did tell her that the counseling and/or medication wouldn't be necessary, as I'd learned, although somewhat late, to be mindful only of each and every precious moment in life. And that this was my prescription, for improving the quality of mental health.

Surf, or die.

@RoboMoralFascist 1st

Yes, I can see how not believing that a long-dead human being is a “prophet” or “son of God” would cause insanity and cruelty such as unprovoked shootings of innocent people. What?

Perhaps “godlessness”, the destruction of the traditional male-female nuclear family, the encouragement of commitment-less sex, the overprescription of profitable psychotropic drugs, and hopelessness might better be blamed. Harboring absurd beliefs about jesus doesn’t necessarily tend to make a person any kinder or safer. One can be godly, and good, without believing that dreck.

Following the golden rule and the Ten Commandments, though, that makes a big difference. It is possible to follow these principles and advice without believing embarrassingly stupid false nonsense about jesus, mohammad, or any other self-aggrandizing or mentally ill man.

Sane people are not ”anti-christ” merely because they find the jesus myth ridiculous and pointless.

Well, while you are 100% right, you are looking at this all wrong-

First of all, let's be honest, the "powers at be" don't want to stop mass shootings, they want more mass shootings. Isn't that obvious by now? What "we" are doing is yielding more, so it's on purpose, not an accident, and not some unexplained tragedy. Mass Shootings are the primary weapon of the gun control crowd, and that includes Big Government that desperately wants to disarm us.

They want more, and more, especially school shootings, it's their bread and butter. They want them live streamed, they want huge body counts, they want all the press coverage, they want grieving parents and friends, and tears, and sobbing, and funerals... It's their preferred narrative.

Also, everybody knows that our society, culture, and nation is creating, fueling, exacerbating the current "mental health crisis". That too is on purpose. They want us scared, unsure, medicated, dependent, distrustful, and angry.

And, nothing makes a parent more of a government dependent peon than a disabled child! It's saddles them for life. So crazy kids, makes for better subjects.

The current race to make your kids crazy, and their parents slaves, is tranny'ism. What more proof do you need?

Sure, Big Pharma is making money, by sacrificing us, our kids, our nation, our safety, but that's only one component. The larger goal is a fractured society, gun control, and absolute government dependence.

It is worth noting the response of the Serbian government to two mass shootings in their country. They call the cause “the normalization of violence.”* There is a book titled “On Killing”** written by retired U.S. military psychologist Lt Col Grossman which explains the mechanisms for enabling people to kill other people. Both the Serbian government and Lt Col Grossman explain we have created a culture of violence which fosters the mass shootings as we are seeing. Much of it is psychological propagated by violent movies, video games, and violent behavior on the part of adults which children see along with bad med’s as mentioned by this article here; and yes part of it is a general population that has been nurtured on violence having access to guns that can spray a lot of bullets in a short period of time. There is a chain of circumstances that enable, and eventually cause one to kill. That entire chain needs to be de-constructed.

This is no new revelation. The real question is why do so many people close their eyes to it?

*<https://www.aljazeera.com/news/2023/5/7/normalisation-of-violence-what-led-to-serbia-mass-shootings>

Whenever I read a thoughtful essay, in order to educate myself more, I go to DaLimbrow Library to get a broader view. I have learned this – CULTURE forms our society and gradually determines the nature of our institutions – therefore, micromanagement in order to correct institutional behavior is impossible without a change of mind in CULTURE! Thus.....

Bad news – it's BAD – really BAD!

Good news – we can see it coming – if you have a sense of history!

Bad news – those who cause it cannot see it coming – they have no sense at all!

Good news – therefore they are unprepared to deal with the breadth of its consequences.

Bad news – that causes BAD things to happen!

Good news – they will lose not only because they are evil – but incompetent!

And that is the good news!.....

.....No, we don't know the day or the hour – but we can clearly see the pattern from history as explained by the authors of 4GW.

Let's also understand something – I do not expect everyone to read these – only those who have a passion for understanding and perhaps actually establishing their own mentoring circle.

Intellectual curiosity is a must at DaLimbrowLibrary – a library of references – designed to be used as the need to know, understand and research comes up!

If you somehow stumbled onto this blog site and are wondering what is going on here

In the meantime, all the signs of DaPerfectStorm are lining up – so be prepared!

Vox Day:

The Deep State is playing an incredibly dangerous game here and has been for some time. The thing is, no matter how it turns out, they are not going to win. Messrs. Van Creveld and Lind seldom see eye to eye politically, so when they are both seeing the same danger on the horizon, it behooves one to pay very close attention.

I culled this from a list of headnotes at –

<https://crushlimbrow.blogspot.com/search?q=Culture+William+Lind&m=1>

@American Citizen

Whitney should have had more of a spotlight on the Columbine pair.

Both were on drug cocktails, but 'Luvox' was prominent. U.S. trade-name for a type of 'antidepressant'.

Would they have done their shooting spree without it?

I don't know, but personally knew of a few people who killed themselves after going on drugs of the same family elsewhere. It has to be a factor.

Doctors here are very reluctant to prescribe anything that has too much reliance potential, they have the right idea.

My opinion is that 'anti-depressants' of whatever type will take many people to a far darker place than depression does, at least on average.

There was an old game, made with an old Nintendo-style R.P.G. engine, called Super Columbine Massacre, not a good video game, but well-designed and made some good points. Worth playing through once.

I did.

Can't be bothered to find a link now, still have it on an old P.C., but would guess it's not hard to find now, too.

I'm from Highland Park,IL. I knew the Crimo family. (Though I only met Bobby III once.)

Crimo had made YT videos fantasizing about the murder of school kids. The government had to have seen them.

Remember, Snowden? Surveillance state?

That's instant disqualification right there! Why wasn't he turned down?? Also he applied for more than one rifle. WTF? You need two guns? Again that's a huge red flag.

We need to force an honest discussion, because the right is not doing a good job of protecting #2. We need to adress things like govt.collusion,the blacks and their violence,racial hatred of Whites(the Good Race),which underlines all of this shit.,and of course,drugs.

I guess we're in quite the jam.

What simplistic one-dimensional bullshit you spout. If you are nearly as smart as you believe yourself to be, you could figure out that Christ represents a philosophy of non-aggression and conscientious peacefulness for millions of Christians. Of course a true follower will be less likely to commit an act of violence. Fwiw, I don't believe in the divinity of Jesus either. It's about the message moreso than the man.

the first “prozac defence” trial ended in a guilty verdict because the company unleashed their well paid lawyers to make sure that it would not become case law. this was around the time that it was made legal to advertise drugs on tv. these two events insured that mass shootings would occur.

the media won't report on the correlation between ssri's and mass shootings anymore than they would've dared tell the truth about covid, it's origins, it's treatments or the vax.

it's not just mass shootings that happen when people go nuts on their meds, or while going off of their meds. this was the defining moment for me when i realized what was happening years ago....

I used to belong to a tennis club frequented by scores of doctors. I surveyed them as unobtrusively as possible on this question:

I work for a large corporation with a competitive health insurance plan. What percentage of my fellow workers do you estimate are on psychiatric medication?

For the most part they looked at me like I was crazy when I asked them this question. I never thought it was a crazy question. About 1 in 4 of the doctors did not react like it was a crazy question but they didn't answer it either.

My guess estimate is around 50 percent. Prozac et al are massively profitable products. Ozzy Osbourne reports that he is more whacked out on drugs than ever and *it's all legal!*

@Robertson

I seen another big reason the state might want to take a firearm away from a law-abiding normal citizen this morning via a link at thelibertydaily.com:

Washington governor Jay Inslee has signed into law a bill that allows the State to “protect minors seeking gender-affirming care from the intervention of ‘estranged’ parents”.

Translation: If a teacher, counselor, or school “therapist” in the state of Washington wants to, they can have the state take away a child to a gender affirming clinic and have a sex change operation performed on that child and the police won’t even help the parents locate the kid to stop it. The kid will literally be hidden from mom and dad until the operation is finished and the parents have a sterilized transexed kid who will never be able to naturally have grandchildren.

I think I can see why the government might want to see the parents disarmed before pulling a stunt like this. This law could be abused of course. Kids can be doped-up enough to say anything for a week or two until they are mutilated. Who is to say traditional Christian children won’t be sometimes targeted by freakish schoolteacher in that lefty state out of resentment? Their will be no legal recourse once it’s done.

The powers-that-be want you disarmed for a reason. This rush to change gun laws and the spate of mass shootings that have started happening in such number as of late smells of premeditation to me, and I’ve been watching politics and culture for quite some time.

I ran out of buttons, but excellent post.

None of these people (if it is real, I truly do not know if they are government ops) have families. They are not sitting down at night, breaking bread with a clean attractive person of the opposite sex and having a nice meal of sweet potatoes and baked chicken in a tidy home of peace and love.

Perhaps “godlessness”, the destruction of the traditional male-female nuclear family, the encouragement of commitment-less sex, the overprescription of profitable psychotropic drugs, and hopelessness might better be blamed.

Yes and look at the photo below. This is a person who has a net worth of 25 million and is considered an icon. He is a “rapper.” Honestly, he looks like a filthy mentally ill varmint that would steal your wallet.

If these people are not “aware” enough to seek wisdom in the forest, in books, in ancient scriptures and this below is what their society holds out as a “God” ...is violence as the end product any shock?

@RockaBoatus

No sane nation allows itself to commit suicide under the banner of “freedom” and “personal liberty.”

Funny, that’s the same ‘logic’ leftist statist employ when it comes to the 2nd Amendment and most of the rest of their authoritarian collectivist shenanigans under the guise of ‘the greater good/for the children.’ I believe ‘The Constitution is not a suicide pact’ is how they usually put it.

Moreover, who says we live in a free country? The ‘5 Felonies a Day’ theory, among countless others, render that a dubious claim, at best. If you mean free to comply, be spied on and have our wealth stolen or forcibly redistributed in the name of ‘curing social ills’ that didn’t exist until statist created them? Then I agree!

These are the problems that we will have to face if we enact laws that allow everyone to smoke, ingest, and shoot-up any strange chemical concoction they might want.

Where does the government derive that authority from in the first place? The vast majority of the problems we face with drugs ultimately stem from Prohibition, ignorance of the Iron Law of Prohibition and general overcriminalization – not an over-abundance of freedom, if there can be such a thing. The only viable excuse for LE interaction should be at the state level, and only when there is a tangible victim.

As a law enforcement officer, you must know that without Amending the Constitution, the federal government has no authority to enact laws that arbitrarily proscribe the possession or consumption of psychoactive substances. The 1970 Controlled Substances Act that enables the Drug War is patently unconstitutional, just like the absurdly twisted interpretations of

the Interstate Commerce Clause (another area where the goals of gun-grabbers overlap with those of drug warriors.) Prohibition, which was far less onerous – but no less destructive! – required the 18th Amendment to enact and the 21st Amendment to repeal. Where is the ‘Drug War Amendment?’

Don’t get me wrong: I don’t advocate abusing drugs. Far from it! I also concede that with great freedom comes great personal responsibility. I’ve lost family and friends to addiction, and struggled with alcoholism in my youth. As you aptly point out, alcohol is among the most ubiquitous and damaging drugs, in my experience. Alcohol withdrawal is hellacious and often lethal, yet it’s legal for adults...as it should be.

Even so, I don’t believe for a second that reinstatement of Prohibition would improve any scenario relating to alcohol abuse and addiction, anymore than the Drug War has improved any scenario relating to drug abuse and addiction. There’s a reason our forebears called off the utterly failed experiment after ten short years of witnessing a reinvigorated organized criminal element commandeer a very lucrative black market windfall. Still, for all their short-sightedness, they deserve credit for following the highest law of the land during the course of their ill-fated experiment.

Even though the U.S. government claims to have fought the “drug war,” the truth is that the government fought it like they do all their wars – namely, with one hand tied behind their back, with glittery campaigns that prove empty, and with a whole lot of wasteful taxpayer spending.

Five decades, a few trillion dollars and a security state with a prison population exceeding that of any other nation on Earth don’t exactly constitute ‘half-measures.’ Likewise, the many tens of thousands of North and South Americans dead from tainted black market drugs and cartel/police violence are irrevocably dead. I’d hate to see what ‘full-measure’ Drug Warrior-ing would look like! More squeezing of the depleted national coffers? More

foolhardy military excursions and an upswing in summary executions that would solve nothing when faced with the Iron Law of Prohibition?

Certain “drugs” were made illegal so that the CIA and other government agencies could have a ready supply of funding without going through “normal” government channels. This is how most, if not all of the CIA wars that JFK warned about were funded. Flying drugs into the USA on government (CIA) aircraft is the easiest thing to do. Customs is bypassed...there is no scrutiny over drug flights into the USA.

This is why almost every government agency is opposed to legalization. Legalization would crimp their money supply (funding).

Add to that, the *symbiotic relationship* that American “*law enforcement*” has with the (illicit) drug importers and sellers. The police NEED the drug dealers in order to justify their existence (and expansion). Police departments get new toys, civil-liberties are trampled on, and we all lose, as a result...

Doing a mass shooting and killing innocent people and children is **never** the right thing to do. Period. Let me make that clear. Kids, just refuse to go to school and stay home if you're that depressed.

That being said, we live in a fallen world in which there is a very obvious war on white boys. Middle school and high school in the (((USA))) are absolutely brutal torture chambers from Hell, starting with the ludicrous fact that the first bell rings at 7:15 AM or so. Everyone is sleep deprived. Kids have to get up at 5:30, wait at a bus stop in the dark, do 7 hours of school, and then 5 hours of homework, if they are good kids who do their homework and take advanced classes. The amount of work expected of the "smart" kids, the good kids who are in AP classes and do their homework, is simply obscene. Each teacher acts as if theirs was the only class. The good kids (the white ones) are doing legit five hours of homework a night after getting home from sports practice. There is, of course, nonstop 24/7 disparagement of white boys, both explicit and subtle. The boys receive this.

Then there is bullying. Even if there is not bad direct dangerous bullying, all skinny little white boys—who see negro worship every day on TV when they get home—feel insecure at best. Middle school and high school absolutely suck for the average 120 pound skinny white boy. Their 17-year-old female classmates are sexually mature (realtalk) and literally ready for marriage if things were still happening naturally. (see Rose in Titanic — she was 17). Most white kids do not have any kind of privilege at all, not much money in their families. They certainly don't have black privilege when it comes to having super high testosterone and related advantages in sports. All school

shooters are raised by single moms and usually some kind of weird adoptions situation. (Most of them have been Jewish or Hispanic, actually.)

Despite the fact that American high school is an absolutely brutal bullshit Hell of an experience, amazingly, 99.999999999999999% of our kids do okay and never shoot up a school. Children are amazing.

The only surprising thing, however, is that there have not been *more* school shootings, given the absolute mess of a *forced-diversity* country in which our kids are being forced to live. Again, not saying it's right to shoot up a school even now, but if we had a 98% white homogenous country without Jewish communists trying to genocide us (realtalk), there would be no school shootings. Diversity plus proximity equals war.

May God never let any school shooting or any other terrible thing happen to my kids, or any kids, as I pray 80 times a day; God knows this comment did not modify my prayer. Amen.

Gladio was directed at the Boomers, the '68ers.

For all their faults the Boomers never got into cutting off their boobs and penises.

As each new generation of mind controlled cookie cutter drone has come out of the government schools, a new kind of narcotic, amphetamine or psychedelic drug come into style. Marijuana, LSD, Speed, MDA, Ecstasy, Crack, Fentanyl. In the perscription world the same was happening. Qualudes, Librium, Xanax, Prozac, etc.

Each new drug has been accompanied by a new vein of music. I believe this is all part of a larger mind control program out of the CIA and Tavistock. We can be certain that they have refined and perfected their mind control technology. They are continually unleashing it against us just as they unleash the weather patterns they create.

Breivik in Norway is a classic example of a false flag psyop. Was Anders Brievik under mind control and/or psychotropic drugs?

Opium does NOT stop depression : it makes it painless and even somewhat enjoyable but depression, which doesn't consist in pain, then get installed permanently : the patient no longer fights his depression but turns it into toxic empathy and can find delight in any criminal or sucking behaviour he needs to get by. Any country where opium or other like semi-legal brain pain killers is available on demand, falls into irrecoverable psychic and economic permanent depression. Make no mistake about it : alleviation such as brought about by opium doesn't cure but rather only enhances the physiological effects of depression onto his body. Prohibition of drugs in the US, by the time it was still effective, was at one time the reason why America was then the only big country progressing economically while in the rest of the world the benefits promised by the industrial revolution had just stopped. Before 1914 there was no need for prohibition because church assistance and obedience was obligatory to get any job if you were born outside the gentry : the churches then also provided many of the social services the state was about to relay and the state also relayed the same prohibitions.

My father, who would be over 100 now, got his first gun at age 11. He hunted squirrels and other small game. He told me once he suffered from some sort of anxiety attacks as a young man, but the woods were always his medicine, his whole life. I was thinking on this, and it occurred to me – What if these shootings now are an atavistic thing? I mean, what did all young men do 5000 years ago? *They went hunting.* And now young men are urged to remain inside watching violent video games, instead of tramping the woods, killing critters (and possibly other people when needed). These shootings are the result of severe societal repressions on young men breaking down. Just a hypothesis.

“If we want to stop the mass shootings, we need”

Lemme stop ya right there. Who wants to stop mass shootings, you? Pfft.

Your CIA rulers don't give a shit what you want. What they want is pervasive threats for a strategy of tension to justify repression, and convenient patsies for CIA's own extrajudicial killings.

Creating a domestic threat to life used to require a painstaking brutalization process, and those early CIA lone nuts mainly killed in onesies and twosies.

<https://centerforaninformedamerica.com/programmed-to-kill/>

But now you program mass markets with FPS games and set them off with neuroleptic agents. That gives a stochastic and unattributable but dependable flow of scary monsters. These drugs would not be on the market if CIA did not want them there. Ask Gary Webb. These drugs are evidently fit for purpose:

<https://amidwesterndoctor.substack.com/p/the-decades-of-evidence-that-antidepressants>

You're Ralling here, expressing outrage over circumstances that your criminal state is perfectly satisfied with. Remember who your government is. CIA. They are chartered with impunity. That gives them the arbitrary power to kill you or torture you and get away with it. So of course they will maintain their capacity. It's their core competence.

If you want to stop the death or torture or war or miscellaneous crime, you are going to have to do what Germans did and storm the Stasi in Langley. Or shell it like Yeltsin standing on the tank. Or do what Mir Aimal Kasi tried to do. Banning drugs is as dumb as banning guns, as long as CIA exists.

| just like (government) “fixed” all the other problems it causes, [eg: war, inflation, poverty, racial division, environmental destruction/pollution etc. etc.],

LOL, government didn't cause war, or racial division. Hostility towards “the other” is an inevitable result of competition for resources. If anything, it's government that enables different races and cultures to coexist even somewhat peacefully. Still-extant indigenous tribes in the Amazon and Papa New Guinea, who have nothing that we would recognize as a government, engage in warfare. War is one of man's oldest activities.

Environmental pollution is caused by human consumption and businesses trying to profit from it. Government is the only feasible curb, through laws and regulations.

And poverty is the natural state of humanity. It's that Leviathan of government that allows for the stable accumulation of wealth. Read Hobbes.

It's funny how Libertarians/Anarchists accuse everyone else of being brainwashed and propagandized when all they do is mindlessly regurgitate easily-refuted talking points.

SSRI Stories

Antidepressant Nightmares

<https://ssristories.org/>

SSRI Stories is a collection of over 7,000 stories most of which were published newspapers or scientific journals. In these stories, prescription antidepressant medications are mentioned. Common to all of them is the possibility – sometimes the near certainty – that the drugs caused or were a contributing factor to some negative outcome: suicide, violence, serious physical problems, bad withdrawal reactions, personality change leading to loss of reputation and relationships, etc.

Lessons from SSRISTories #3 of 5: HOW do SSRIs cause violence and suicide?

@Anonymous

I'm an investigator for governmental and nongovernmental entities and part of my work involves looking into a subject's mental health issues and/or mental health history.

I wish I had a dollar for every case I've seen where mere recreational marijuana use develops into psychosis/psychotic episodes and/or assorted schizoaffective disorders.

Perhaps the craziest part of it all is that there seems to be a deafening silence on the issue and the public has zero knowledge of this unfolding slow-motion societal catastrophe.

There is nothing our jew rulers want more than a society of compliant stoners. They especially love to see Whites damage their ability to think and act because of usage of cannabis and other drugs. To further that, they are more than willing to accept the various forms of mental illness that happens to many recreational drug users.

They went hunting. And now young men are urged to remain inside watching violent video games, instead of tramping the woods,

Millions of young men these days spend much of their time indoors but only a handful of them become mass shooters, so that can't be the cause.

Off the top of my head I can think of at least one school shooter who was into hunting: Ethan Crumbley (Oxford High, Michigan, 2021).

I remember reading a book about Jesse Pomeroy, who was a serial killer by the age of 13 back in the 1870s. The book also discussed other heinous crimes from that era committed by children and teenagers. Young people in those days spent a lot of time outdoors. At the time, blame was directed at "dime novels," which featured often violent adventure stories involving cowboys and Indians, pirates, etc., just as today people blame video games, movies, music, etc. People just can't accept that human nature has a very dark side and some young men are prone to viciousness.

The most likely causes of mass shooters are certain mental conditions: high levels of Dark Triad traits (narcissism, psychopathy, Machiavellianism), extreme autism, extreme psychoticism. (Note that these are not "illnesses" in the sense that they can be cured. They are *who the person is* from birth.) Group these with access to guns and a mass media that will satisfy their desire for infamy by broadcasting their names, images and deeds to the entire world for weeks, months, even years afterwards and you have the recipe for the (still thankfully rare) phenomenon of the mass shooter.

@Brosi

As each new generation of mind controlled cookie cutter drone has come out of the government schools, a new kind of narcotic, amphetamine or psychadelic drug come into style. Marijuana, LSD, Speed, MDA, Ecstasy, Crack, Fentanyl. In the perscription world the same was happening. Qualudes, Librium, Xanax, Prozac, etc.

Hard drugs is more then enough damaging in it self, maybe you are right its is some involvment of some secret services, some sources say that it is primary used as a source for black budgets.

I think that maybe Timothy Leary was connected to some conspiracy to influence the anti war hippies.

Did not he say somteting like: Turn on, tune in, drop out.

You dont need to go further then to the newspapers, television and movies to effectivley mindcontrol people.

No drugs needed for that. There exists less drugaddicts then there existes mindcontrolled straight edge people.

Gen X was the guinea pig for doctors, giving them SSRI medication for depressions.

Who thought it would be a good idea to give that to children and young adults, I dont think it is wise to medicate with those types of medicine.

Firstly it is only going to give relief for symptoms and even that is not for certain, and the side effects from their use are bad.

Secondly it will prevent any real rehabilitation.

People should ask themself why so many more young people are having a hard time and their doctors want to medicate them.

You would not believe how they tried to beat everyone they could over the head with Breivik, and still are doing it.

“Long-acting methylphenidate has an effect on aggressive behavior in children with attention-deficit/hyperactivity disorder” aggression is frequently observed in both children and adults who are being treated for ADHD with methylphenidate.

Therefore, as reported in March of 2006, the Food and Drug Administration issued a new warning for the parents of children being medicated with methylphenidate (Ritalin) and other ADHD prescription medications. They suggested that parents be on the lookout for angry and violent outbursts and consult with the prescribing physician should aggression become a problem.

“Citizens Commission on Human Rights Florida” (which claims to be a mental health organization – why not name yourself as one then ?) sounds like yet **another** white American conservative citizens nonsense crap clown grift show to me. Their main link is to their own ‘investigation’ on the topic. So that’s not a good start.

Scientology, Christian Science, Chiropractic, as well as all marketers in the alternative health industry make similar claims.

Ultimately this is a science question – and should have a science answer, but the answer should be drug specific.

There is a considerable movement in the US in particular, to claim the public are being loaded up with unnecessary and dangerous drugs and turned into either suicidal zombies or psychopathic maniacs by Big Pharma. Their central theme is to insist that these mass shootings are because of these drugs.

Yet quite a number of these people also believe every mental health condition has actually been made up by Big Pharma too to sell you these drugs, and if people just ‘lived a healthy lifestyle’ any problems they feel would just go away. So presumably they don’t believe anyone is actually capable of such violence.

I wonder if maybe these shooters had serious mental health problems anyway that’s why they were offered the drug treatments. Not the drugs did it to them exactly. But it’s possible the drugs could have a role in some cases and that does need proper investigation.

But alcohol is much more of a significant factor in drug fueled death: the stats are dizzying in the US and far outweigh any drug mentioned here at least from my quick look on this.

I suspect these same people want to hang on to alcohol as their 'Jesus juice' despite that fact its literally killing a lot of them.

@Emslander

The Corbett report has articles on how psychiatry was almost destroyed before Rockefeller figured out his oil could be used as feed stock for drugs. Rockefeller single handedly brought psychiatry back to life because he had the money to do it. Use the search box to find the articles.

The entire DSM has not a single illness that has an empirical test associated with it for the overall diagnosis. Psychiatry is one of many fraudulent professions and no one should be seeing a shrink under any circumstances. Those violent cretins in the society need to be put down on their first offense. Advertising for drugs should be halted because the weak of mind fall prey to the suggestion that they need help coping with ordinary day to day existence.

I was in New York recently and I estimate that 30+% of the advertising on TV was for Big Pharma always with an 'ask your doctor' suggestion. Advertising is professional lying and when it's done to the extreme, it's mind control propaganda.

Because the criminals and Cartel gangs carry and use assault weapons. Most violent criminals use semi-automatic pistols, so the police had to evolve to use semi-autos too in order to at least give themselves a fighting chance. The old days of revolvers simply won't cut it today.

Most cops are not that good with their own firearms anyways, and six bullets in a revolver is woefully inadequate. Yes, shot placement trumps everything, but the majority of officers can't shoot as well as most people imagine.

If you were to look at an actual hardcopy Psychology Today in magazine form, I wonder how many drug ads would be contained within.

And why wouldn't the mainstream news media mention it?

Because big pharma spends billions annually on any given channel. That's part of the reason why I cancelled my cable, I was sick of the damned drug ads, constantly. And now they have infected Facebook and YouTube. Imagine that.

And it's well known that doctors get perks and kickbacks from big pharma.

And Scientology is a bit fringe, with their membership in decline. While some celebrities are Scientologists, I don't see them being that much of an influence on the younger crowd.

America does not “have more mass shootings per capita than any other country in the world. The media makes it look that way because every time there is a mass shooting , that is made major national news. If the media reported like fifty years ago, the great majority of shootings, would be unknown outside local news. Per capita, mass shootings are higher in New Zealand which also has plenty of guns and psychotics. Not to speak of Palestine. In Palestine, the insanity is being driven by Zionism run riot.

@Verbum Vincet

Yes, the Left does employ a similar argument to jettison the 2nd amendment. But I expect such piss-poor arguments and weak analogies from those folks.

Sorry, the analogy doesn't follow. A significantly less number of people are killed annually by firearms or even by active shooters than by violence connected to drug Cartels and narcotic overdoses. Most people aren't abusing their firearm rights, but the greater majority of Americans sure seem to be abusing both legal and illegal drugs.

The nation is a festering cancerous mess, putrefying to the core. Radical as well as extreme measures need to be taken if she is to survive. But she won't survive because the American people lack the collective will to do it. The measures needed are hard, but Americans are too soft. They are also unwilling to think long term about the devastating impact each generation will feel as a result of government policies that allow free drug usage with no criminal or societal penalties.

The Left pushes drug legalization because they know it will destroy the West. Once it is decimated by liberal social policies and drug legalization, they are in a much better position to implement their feel-good Utopian 'values.'

But again, no sane nation knowingly allows its citizenry to willfully smoke, ingest, and shoot-up anything they like – especially after witnessing 50 years of what happens to society as a result. We need very hard and harsh leaders to do now what should have been done decades earlier. The problem would have been stamped out much earlier, and fewer Americans would have died as a result of drug crimes and overdoses.

At a minimum, drug dealers should be lawfully tried and quickly executed if found guilty. Those citizens who are narcotic addicted ought to be given compassion and every means available to overcome their addiction (rehab, etc.). At some point when all conceivable efforts have been exhausted, such people ought to be removed from society and housed separately so as to not victimize the rest of us.

The problem may never be eradicated completely because of the addictive nature of so many humans, but if harsh and necessary measures had been taken from the outset, the drug epidemic would not nearly have been as severe as now with our major cities inundated with crazed and drug addicted homeless folks, Cartel gangs fighting over drug territory, not to mention the Fentanyl crisis throughout much of rural America.

There are many things that a sane nation disallows that our “freedom loving Murica” allows to its own demise. Governments that protect themselves from contemporary “American values” are doing what is right, and this includes creating draconian measures to prevent illicit drugs from taking root.

A doped up nation is a defeated nation, and ready to be taken over by outsiders.

Yes, it's not pretty, but it's necessary. It includes harsh penalties not just for the ‘harder’ narcotics such as meth, heroine, and cocaine, but also for the ‘softer’ drugs such as Marijuana which is a definite nation wrecker.

The Left and gullible Libertarians push hard for full Marijuana legalization because they know most people can't use it moderately, and because it makes people dumb – and a dumb citizenry is what the Left wants and needs to implement their social schemes.

More could be said, but my comments are running too long at this point. Thanks.

But Reagan has not been governor of California for nearly half a century already. The federal legislative repeal you mention took place over four decades ago.

[...]

Just keep living and wallowing in shit and blame someone long gone?

Rome wasn't built in a day, nor did it decline and fall over the course of just a few days.

The introduction of various psychotropic drugs like Miltown (1955) to ease anxiety, and other stronger stuff to control or sedate people with more serious mental conditions, encouraged and empowered a movement to deinstitutionalize insane asylums, which were commonly large, dank, dirty, depressing facilities that got a lot of bad press, in favor of community mental health clinics. However, ...

“With the Omnibus Budget Reconciliation Act of 1981, the federal government ended direct federal funding for community-based nursing homes that primarily treated patients with mental health problems...”

<https://journalofethics.ama-assn.org/article/deinstitutionalization-people-mental-illness-causes-and-consequences/2013-10>

The first famous massacre in the United States happened in 1984, but I don't think 1981's OBRA had much if anything to do with it.

Apparently fully aware that he was crazy, James Huberty had sought mental health care, but due to a clerical screw-up, incompetence, and/or apathy, mental health authorities were unable to reach the madman before he went on his killing spree, slaughtering 22 at a San Ysidro McDonald's with a variety of weapons.

Like it or not, some people – waay too many – are crazy, and pose a danger both to themselves and to others. California currently maintains five state hospitals for the criminally insane and violent sexual predators, with a total capacity of about 2,000 beds.

Meanwhile,

In California, 1,243,000 adults have a serious mental illness. 1 in 6 U.S. youth aged 6–17 experience a mental health disorder each year. 396,000 Californians age 12–17 have depression. In California, 1,243,000 adults have a serious mental illness. 5,566,000 adults in California have a mental health condition. That's more than 6x the population of San Francisco.

<https://namica.org/what-is-mental-illness/>

Fortunately, there are plenty of sidewalks in California where at least some of the deinstitutionalized crazy people can pitch a tent, and sack out.

I'd put early traumatising as the chief single contributing factor to all shootings. But it never acts alone. It's always a combination of factors.

The starting fact in searching for causes should be that the occurrence of mass shootings is considerably higher in the US than elsewhere in the world. When you find out what makes the US society so different than other ones, you might just find those causes.

You do more antidepressants and you have more guns than the rest of the world – but that's not where I'd look. Icelanders do an equal amount of antidepressants, but they rather commit suicide than murder. In Switzerland they all have guns – but no one shoots up schools.

What I do see as something that really needs to be brought to light, that nobody really talks about is – how insanely competitive and how low on cohesion your society is. You compete in business and in private lives alike, from an early childhood onwards. Always looking for better deals, always looking for ways to get ahead. That produces a lot of pressure and disaffection if the things don't pan out. You also move a lot. Immigration, moving states, commuting, you name it. That means many people never settle down and are strangers for a significant part of their lives.

Basically, you produce more *disaffected strangers* per capita than the rest of the world. People who got nothing to hope for and to whom the lives of their fellow residents mean nothing. With an inevitable childhood trauma and an access to a firearm. Those are your candidates for the next Columbine or Las Vegas.

Hope this helps.

It is not by accident that we rarely hear about the working class, socialist origins of the NSDAP and the “economic miracle” that lifted Germany out of the Depression in the 1930’s.

Much of the success was due to the expulsion of the Jewish financiers from the banking system and the policies of Economics Minister Hjalmar Schacht.

German workers viewed the Jews as parasites because they were mostly employed in occupations considered non-productive. Hitler’s anti-Jewish policies had great appeal for them.

A good article from Mike Whitney. I think it quite likely that drugs, both legal and illegal, may be behind a lot of the mass shootings. But, as Whitney points out, this is not going to be explored by the MSM as they derive a lot of their ad revenue from Big Pharma (something like %15). So the answer becomes guns. Yeah, well, when was the last time you saw an AR-15 advertised on TV.

And of course, disarming the public fits in the with the agenda of TPTB, who want a docile population of unarmed serfs.

There may be other reasons too. Violent videogames and violent, amoral movies might be one reason. Yes – before the libertarian crowd comes out of the woodwork to admonish me for thinking such a thing – I realize that most people who watch play those videogames and watch those movies don't become mass murderers. But for people on the edge of craziness, they might have a very baleful effect on the mind.

There is also a theory that a lot of the people who become rampage killers might have, in the old days, become serial killers. But with the advances in forensic science and the ubiquity of surveillance, it's just too difficult to become a serial killer anymore. People who try get caught early in their "career". So maybe that type now just resolves to do all their killing at once. Not sure about that theory. Most serial killers in the past who were caught seemed keen to survive, whereas so many of these rampage killers seem to have a death wish. It does beg the question though: what do those serial killers do now? Do they go into politics?

The Left pushes drug legalization because they know it will destroy the West. Once it is decimated by liberal social policies and drug legalization, they are in a much better position to implement their feel-good Utopian 'values.'

I suspect that a lot of the push for legalization ultimately comes from the globalist overlord class and their technocratic minions. They realize that millions of people will be rendered economically redundant due to automation. The legalization of drugs provides a way to pacify them and make them content with their ever shrinking life prospects. They will be encouraged to draw UBI, live in a box, get sterilized, and anesthetize themselves with media and drugs. Failing to reproduce, they will eventually die out. It's the soft-kill approach.

Presently, by elimination, I limited my set of choices to the following:

-Tente en el Aire con Mulata = No Te Entiendo

-No Te Entiendo con India = Salta Atrás

-Mestizo con India = Coyote

-Salta Atras con Mulata = Lobo

Terms are so funny that I strongly advice non-Spanish speakers NOT to paste them into Google Translate. Anyway, my investigation is ongoing.

BTW Aryan Brotherhood (aka AB aka Alice Baker) accepts pure Spaniards (born in Latin America) as members.

The Bonnot Gang (*La Bande à Bonnot*) were French anarchists active 1911 to 1912. They carried out the first-ever bank raids using fast cars (Delaunay-Belleville limousine), semi-automatic pistols (Browning), and repeating rifles (Winchesters) – none of which were available to the police.

French cops learned the hard way they had to keep up with the crooks.

> They are who the person is from birth

There's no proof for this. Like with faggots, nobody is born gay, gays become gays because they were molested as children. Whores are whores because they were touched by daddy or step daddy. The mind of a child is very fragile and can be shaped in the wrong way which might induce those negative behaviours as you've mentioned. Autism is caused by vaccines.

Thank you for your insight into the American psyche. "I'm a stranger here myself," seemingly applies to most Americans, including legacy citizens and recent immigrants alike. We lack a sense of community, common purpose and loyalty to one another. Alienation is endemic and everywhere.

America is so fragmented and chaotic that its doubtful that two sides could coalesce long enough to have a civil war.

No one is more dangerous than a man who feels that he has nothing to lose. Alienated and devalued young men will continue to exact their revenge on us until we restore a cohesive, traditional society in which everyone has a job and financial security.

My law school roommate in the mid-'70s was doing an externship with the LA County DA's Gang Unit ... mostly concerned with the many, many thousands of mexican gang members.

LAPD at the time was scared to death of those gangs because the gangs had stolen fully automatic weapons and M72 LAAW rockets from various armories throughout CA ... and all LAPD had was .38 specials and some Berretta 9mm pistols ... hardly an even match with those wetback gangs.

Fast forward to early 2018 when the leaders of the 5 biggest mexican gangs in LA County held a sort of 'press conference' to inform folks that they had more than 250,000 heavily armed gang members ... and that, as usual, they'd be committing any crimes they chose, with impunity ... and they meant it.

Ya, I hear that the USG moved Somalia to Minnesota. And then they moved some up to Anchorage . Nice guys these immigration " specialists" that move 3rd world people of color into traditional White zones. Makes me think that they are purposely destroying our once White Country – Oh wait – they are destroying America.

I grew up on the North side of Chicago , went to school with Bugsy Moran's grandson – We had gangs back then – Gangs in order to keep our neighborhoods free from the South side people of color. Wonder why white Gangs were outlawed by the Gov. but the Black gangs and Latino gangs are still around.? Then re read the first three sentences. Today, I reside in a really big White Gang called Russians – they have been outlawed by the USG too !!! Sabe' ?

@Kak

Like with faggots, nobody is born gay, gays become gays because they were molested as children.

There are several theories as to where homosexuality comes from. One is that it's genetic. Another is Gregory Cochran's theory that it's caused by a virus:

https://en.wikipedia.org/wiki/Gregory_Cochran

A google search just revealed that Ron Unz actually wrote about this topic several years ago. He speculates that it may be a combination of both:

<https://www.theamericanconservative.com/gay-gene-vs-gay-germ/>

I can't think of any reason (psychological, physical or otherwise) why being molested would change one's sexual orientation. It's possible that, if homosexual children are molested more than other children, it's because predatory pedophiles sense something different and vulnerable about them, thus making them suitable victims.

People are drawn to simplistic explanations for homosexuality, possibly because it's an uncomfortable, perplexing topic. It used to be thought that it was caused by overprotective mothers, for example.

Whores are whores because they were touched by daddy or step daddy.

Prostitution or simple sexual promiscuity are essentially dramatically expedited extractions of resources (financial, emotional, sexual etc.) from males. As opposed to a woman who withholds sex in exchange for the long-term commitment of

marriage with its concomitant long-term financial resource provision and emotional and sexual attention, a whore simply takes the money for the night and moves on.

There are several different reasons why a woman would engage in these behaviors. If a father abandons a family, for example, a young female might internalize the idea that men are not to be relied on and so she should extract resources from them as quickly and efficiently as possible. Another is emotional instability caused by various forms of abuse or neglect (not just sexual) or substance abuse.

And then some women are just predatory by nature. Women who are high in narcissistic or psychopathic traits will use their sexuality to obtain financial resources, power and narcissistic supply. If they were molested by “daddy” it’s probably due to his being high in these traits as well, which they inherited. One would have to be a psycho to molest his own daughter, after all. (If they were molested by “stepdaddy” it could be due to their mother’s narcissism/psychopathy leading her to make poor choices in men.)

| Autism is caused by vaccines.

Talk about something for which there’s no proof. All of the great scientists, philosophers, mathematicians, musicians and artists who ever lived fall somewhere on the autism spectrum. Vaccines have only been in widespread use over the past two centuries.

If autism is on the rise in the modern world it’s possibly due to the modern tech-oriented economy allowing more high-IQ spergs to become wealthy and successful and thus desirable mating partners. Since asperger’s has high heritability, and since they’re likely to mate with someone “on the spectrum” as well, their children will inherit their autistic traits. There’s evidence that levels of autism in the children of Silicon Valley are quite high:

<https://www.wired.com/2001/12/aspergers/>

Or it could just be that women are putting off having children until later in life which leads to more developmentally-delayed children. In any event, there's no evidence that vaccines cause autism.

Absolutely accurate. The pharma advertisements have only one purpose and that is to maintain control. The drugs have to be prescribed, so the doctors are the customers.

In our long and painful experience with psychiatry, my daughter received numerous diagnoses, all different, depending on which doctor she was seeing. Finally, I asked a doctor who would talk to me about the situation and he said that the psychiatrists have accepted the fact that there are no identifiable lines that can be diagnosed. They throw psycho terms at you and then prescribe drugs. The basic problem is that the person has been loaded down with so much stress from reactions to their behavior that they don't know how to act. Then drugs go on top of that.

It's an attack on normality. Normality is the disease in America these days. Competence and normality. Don't send your kids to any school run by the State. That's the ticket to sanity.

Germany has been saddled with its own “**Stockholm Syndrome**” ever since the summation of the Second World War.

There are some brave Germans who have gone against the “*official narrative*” of WW2 with Germany seen as being on “*the wrong side of history*” and as such are (still) considered to be “the bad guys”, but they are either too few or afraid of being “outed” as “holocaust™ deniers”, subject to severe punishment, and yes, **Nazis** (which is unfairly still a pejorative term in Germany and in much of the rest of the western civilized world). Even Canada has criminalized honest investigation into the so-called “holocaust™”.

This is especially bolstered by the (in)famous “*jewish holocaust™*” fable which was created by the Allies in order to keep Germany permanently demonized.

It could be safely argued that even Americans have been unwitting victims of “**Stockholm Syndrome**” especially when it comes to “*all things holocaust™*”.

It is long overdue to conduct a full, impartial, honest of all holocaust™ claims and to “*let the chips fall where they may*” and finally expose it as the massive jewish fraud of the twentieth and twenty-first centuries.

It takes approximately 100 years for the historical record to “*correct itself*” by shedding the “*victor’s biases*” and finally letting the chips fall where they may.

We are starting to witness the last days of the “holocaust™” lie...

You are correct about Switzerland having an armed population. As their weapons are state-issued, their proliferation is quite large among the population.

The “fly in the ointment” is ammunition, which is strictly controlled. If you are issued 100 rounds, you had better have 100 rounds upon inspection. You need to account for ammunition used in training and prove that you used it as such.

SSRI Stories – Antidepressant Nightmares

<https://ssristories.org/>

SSRI Stories is a collection of over 7,000 stories most of which were published newspapers or scientific journals. In these stories, prescription antidepressant medications are mentioned. Common to all of them is the possibility – sometimes the near certainty – that the drugs caused or were a contributing factor to some negative outcome: suicide, violence, serious physical problems, bad withdrawal reactions, personality change leading to loss of reputation and relationships, etc.

Agree that we need a system enabling affordable family formation for native-born US citizens. I'm all for a public bank, criminal punishment of bank executives/directors and other usurers, public ownership of natural resources, universal medical and dental care (perhaps funded by the proceeds of those publicly owned natural resources), a prohibition on non-citizens or corporations/trusts owning residential rental property, refinancing all US citizens' mortgage and vehicle loans at zero percent, the drastic reduction of military / war expenditures in favor of high-speed rail, more hospital capacity, and other infrastructure, phasing out the federal tax on wages/salary but raising the rate on capital gains (on things other than the sale of a first home), etc.

But the inability or unwillingness to use a condom is no excuse for murdering the innocent human being that results. Working or not working, poor or not, people who hire "doctors" to chop up their own helpless child should be tried, convicted for first-degree murder, and executed or imprisoned for life — along with the "doctor."

Use a condom. Or abstain if you allegedly can't afford or figure out how to use one. Poverty is no excuse for murder.

Fink, M.D., an expert in the study of violent behavior and a past APA president, commented. "I can tell you that as a psychiatrist who has practiced for a long time, I was unaware that [varenicline and antidepressants] had been linked with violence toward others..."

Illogical, because length of practice has nothing to do with being familiar with "had been linked with" studies. Fink should read his journals. At least the abstracts. (Or, he could simply watch drug ads on tv, because these give the side-effects information.) But the psychiatrist doesn't keep up. How does that make you feel? Well, we're coming to the end of the comment, so we have to stop now; we can pick-up here next time.

I agree 100% with your first paragraph and with the moral tenor of the rest however....

If it weren't for abortion, millions of Afreakin babies would have been born in America since Roe vs. Wade and that makes abortion the lesser of two evils.

Sometimes we have to give way on our moral principles in order to make life livable. An example: in Peter Freuchen's book *Vagrant Viking* he describes how during sustained periods of horribly inclement weather—even by Greenland standards—there were times when the starving Eskimos would be forced to choose between saving the lives of their children or themselves.

Contrary to our Western European values, the Eskimos would expose their children, leaving them to die.

Why? Were they barbarians who had no love for their children?

No, that's not it. For ever after, they would avoid the place where such a terrible fate had been imposed upon them.

But the grieving parents knew that they could somehow recover from their terrible loss and beget more children, while their children would not survive a single day in the Arctic without their parental care and protection.

I'm not saying that this is an exact corollary, just that noble sentiments aren't the only criteria.

“Perspective is a bitch”... and your enemies seldom allow you to enjoy your success.

When Britain and France became allies of the Soviet Union they reduced themselves to minor players in geopolitics, and ultimately to 2nd-rate military powers with serious regrets about all that could have been but never was.

Had Britain and France joined Germany in a tripartite alliance they could have defeated

the Communists and dominated the Eurasian landmass, with Italy and Japan backing them up. Instead, Stalin completely outmaneuvered them, Germany and the U.S. Stalin received invaluable help from Communist spies in the U.S. and Britain, including Assistant Secretary of the Treasury Harry Dexter White.

Despite its huge military losses Russia was the strategic victor of the War, with the confirmation of this being their postwar domination of Eastern Europe and the Communist takeover of China in 1947.

So why did Great Britain act against its own interests and undermine European unity? The answer is that Zionist bankers in the U.S. and Britain were directing policy and Roosevelt and Churchill were mere puppets in the “hate Germany game.”

| Had Britain and France joined Germany in a tripartite alliance

Hard to see how this would have been feasible as it was Britain and France who led the way in imposing the terms of the Versailles peace treaty ending the Great War – terms which did so much to propel Adolf Hitler to power. Iirc one of Hitler's early political actions was the Beer Hall Putsch in 1923 which was in part to protest the humiliating terms of the treaty of Versailles.

Now a topic in Germany that really nobody likes to talk about is how much more humiliating the outcome of the Second World War was in some ways as it resulted in a divided nation.

@the Man Behind the Curtain

You are right about the improbability of an Anglo-French-German alliance, but this was a perfect situation for Realism to prevail over prejudice and bitter memories. Britain's long term policy of aligning itself against the dominant continental power failed because of miscalculations about the relative durability of the Russian and German armies.

The Russian strategy of "victory through retreat" was understood by the German General Staff but the "Bohemian Corporal," as F.M. Paulus referred to Hitler, could never grasp the need to withdraw and regroup. The defeat and surrender at Stalingrad was a direct result of his stubborn refusal to accept advice. If the British had known of Hitler's delusions about his brilliance as a military strategist they might have reduced their estimate of the chances of a German victory and not supported the Soviets.

Of course, predicting the outcome of a war is impossible, but from the day Hitler became Chancellor the Western propaganda machine began a frenzy of unrelenting attacks on Germany, combined with substantial praise of the Soviets led by homegrown Communists, fellow travelers and Jews, in the U.S. and Britain. Neither the Americans nor the Brits understood that the Communists hated them as much as they hated the Nazi regime, until the War ended.

The enemy of my enemy is not always my friend.

@24th Alabama

@Emslander

| Hitler regularly transmitted offers to UK to preserve peace in Western Europe

That's a good point... why didn't the UK go for it?

| Britain's long term policy of aligning itself against the dominant continental power failed

I'm not sure that it did fail. The collapse of the British Empire might have been seen to be a failure of British policy in WWII, but I think the writing was already on the wall as that the whole enterprise was seriously over-extended as far back as in the 1920s. Had Britain accepted Hitler's peace terms, it would have had to deal with a declining empire and an unfriendly European super-state right next door that could easily threaten its sea lanes at will.

There seems to have been considerably more antipathy towards Germany in England than in the USA (which has so much German blood, and includes German phrases like *kaput* in its daily vernacular):

"You must understand that this war is not against Hitler or National Socialism, but against the strength of the German people, which is to be smashed once and for all, regardless of whether it is in the hands of Hitler or a Jesuit priest."

– Winston Churchill

Let's also remember it was Margaret Thatcher, out of all major NATO leaders, who was most opposed to German reunification in 1989.

It wasn't a foregone conclusion the UK or Europe would be flooded with hostile immigrants in 1938 or 1946 as an outcome of any of this, either, although I guess there were a few advocating for that kind of policy, like the childless Coudenhove-Kalergi.

I don't entirely understand British attitudes towards Germany and where this hostility came from (after all Britain was allied with the Germans back in the Napoleonic wars) but if I had to guess it was four years of WWI? That was really the war that destroyed British strength and made it incapable of maintaining its Empire (even though it expanded a little on paper after that war).

Overall, the British did succeed in shattering Germany – the partition of Germany was arguably a worse outcome for Germany than even the outcome of the first world war. Taken together, the map of Europe had far, far more countries in 1946 than it did in 1913, when the German and Austrian empires ruled most of continental Europe. Seen in this light, it might have been seen as a success. As for the Soviet Union, as Antony Sutton described them they were “the best enemy money could buy.”

I don't know, overall it seems to me that Europe with its many peninsulas and islands defies attempts at political unity. There's a real debate in the UK now as to whether its future lies with the United States, Europe, or some other option. I think a U.S./UK split in this decade could usher in some kind of Anglo-German alliance. The fact that the Sputnik shot is basically rebranded AstraZeneca makes me think perfidious Albion is up to some kind of trickery in spite of it being the leading supplier of arms to Ukraine. What is going on over there I wonder?

@Sparkon

California currently maintains five state hospitals for the criminally insane and violent sexual predators, with a total capacity of ~~about 2,000~~ **6,087** beds

I don't know why I typed 2,000, when I knew it was about 6,000. Patton alone has over 1,500, while Atascadero, Coalinga and Napa each house around 1,200.

But typos aside, the point remains that there aren't nearly enough mental health services available to monitor the millions of crazy people loose, unmonitored and unsupervised in California, and throughout the U.S., because of increased reliance on drugs since at least the introduction of Miltown in 1955, and the reduction and eventual elimination of most community mental health services.

In 1900, Illinois was the 3rd largest state in the Union behind New York and Pennsylvania, when the Illinois Asylum for the Incurable Insane was established at Bartonville, near Peoria, as the result of legislative action from 1895. Eventually renamed Peoria State Hospital, the asylum operated from 1902 until 1973.

https://en.wikipedia.org/wiki/Peoria_State_Hospital

However, in 1967, the \$6.4 million George A. Zeller Zone Center opened a sprawling mental health clinic on several acres near the middle of Peoria, but that facility too shut its doors in 2002, and is now part of Illinois Central College

<http://www.meanwhilebackinpeoria.com/blog/2014/9/24/this-used-to-bezeller-mental-health-center-now-its-ilinois-central-college-north-campus>

Marty Wombacher's article about Zeller includes several comments from former residents of the facility...

@RadicalCenter

Atheism is an admission of ignorance. If you cannot or will not correlate Christianity and Jesus Christ as having a vast benefit to behavior, culture and society... then prescription induced insanity world will probably continue in your model until it kills you.

America exists in a degraded and debased condition, it is clearly no exaggeration. The evidence piles up on a daily basis. You think we've scraped the bottom of the barrel; then it turns out there were just a few inches more to go. Etc.

@the Man Behind the Curtain

The British animus toward Germany is baffling since they have so much in common. Just as the Arabs and Jews are the “children of Abraham” the English, French and Germans are the descendants of Charlemagne. Cousins are known to quarrel and fight but this explanation is just whimsical.

A more believable reason is a political and economic rivalry for dominance, with the Germans usually playing catch-up because of the early British lead in sea power, political unity and industrialization. The German States were unified in 19th Century and Germany achieved preeminence in science and industry, and were also feared as a military threat after the Franco-Prussian War.

As the stage was being set for WWII in the 1930's the British and Americans were still stuck in a 1918 mindset. Remembering the crushing defeat of the Russians by the Germans in WWI, they overlooked a number of critical factors. Since the Mongols had been expelled in 1480 only Napoleon had been successful in capturing Moscow, which became only a Pyrrhic victory after his broken army straggled back to France, being sniped at much of the way.

In the Great Northern Wars, the Swedish Army only advanced to Poltava, Ukraine where it was defeated (1709) by a Russian Army almost double its size. The French and Swedes learned some painful lessons about Russian geography, weather and logistics. Hitler and the Allies did not comprehend the Russian mastery of these elements, leading to their underestimation of the Soviet Union.

From your wiki link:

“ The degree to which racial category labels had legal and social consequences has been subject to academic debate since the idea of a “caste system” was first developed by Polish-Venezuelan philologist Ángel Rosenblat and Mexican anthropologist Gonzalo Aguirre Beltrán in the 1940s. Both authors popularized the notion that racial status was the key organizing principle of Spanish colonial rule, a theory which became commonplace in the anglosphere during the mid and late 20th century.”

You will notice Angel Rosenblatt is a Jew, intent on fragmenting the unity of the Hispanoamerican countries, based on one language, one religion and a common culture. Perhaps on the payroll of Freemasons, who love spreading the Spanish Black Legend to the gullible, also as a way of “divide et impera”.

The Spanish, who never implemented a caste system (as acknowledged in your linked entry), quickly realized you couldn't label infinite shades of brown, and didn't need to. Besides, they had the experience of Visigothic Spain, where both Hispano-Romans and Goths became a fruitful nation as they accepted in 589 d.C., one law and one religion. Intermarriage was allowed, as befits a society with a minimum of personal agency. Not to mention 700 years of Muslim rule, with inequality under the law such that revolts from berbers, Syrians, Christians and others were unstoppable.

Popular language is often ingenious, Spanish is the intellectual home of a very high culture, but racial epithets (los motes, por así decirlo) are not the basis for sound policy or personal decisions.

-The Spanish, who never implemented a caste system-

My friend, I respectfully disagree.

Estatutos de limpieza de sangre

[https://es.m.wikipedia.org/wiki/Estatutos de limpieza de sangre](https://es.m.wikipedia.org/wiki/Estatutos_de_limpieza_de_sangre)

Sistema de castas colonial

[https://es.m.wikipedia.org/wiki/Sistema de castas colonial](https://es.m.wikipedia.org/wiki/Sistema_de_castas_colonial)

-Spanish is the intellectual home of a very high culture-

And a brutal sense of humor I might add Recently I saw one very funny cartoon in El Diario – Tombstones in Medellín cemetery bearing inscriptions:

- 1.En algo debe haberse metido
- 2.Se mataron entre si
- 3.Fue un pleito de pandillas
- 4.Que hasía a esas horas ?
- 5.Qién sabe en qué andaba
- 6.Era puta
- 7.Fue un ajuste de cuentas
- 8.Vestía provocativamente

[@RockaBoatus](#)

pharmaceutical pushers (known as medical doctors)

Well-meaning doctors have to tread a fine line. In the corrupted medical industry, the best they can do is to find an excuse not to prescribe. I know of one GP murdered in his clinic, either by a patient or drug pushers.

The root cause is the pseudo-science of psychiatry – and much of the rest of medicine.

[@John1955](#)

As I suppose you can read in your own wiki entry, the caste system is a fake-news historiographical term invented in the 20th century by.. Angel Rosenblatt.

Brutality is a failing common to all mankind.
